At present, a nativist turn in Indian political theory can be observed. There is a general assumption that the indigenous thought to which researchers are

supposed to be (re)turning may somehow be immediately visible by ignoring the colonization of the mind and polity. In such a conception of svaraj (which can be translated as ‘ authentic autonomy ’), the tradition to be returned to would be that of the indigenous elites. In this book, this concept of svaraj is defined as a thick conception, which links it with exclusivist notions of spirituality, profound anti-modernity, exceptionalistic moralism, essentialistic nationalism and purism. However, post-independence India has borne witness to an alternative trajectory: a thin svaraj. The author puts forward a workable contemporary ideal of thin svaraj, i.e. political, and free of metaphysical commitment. The model proposed is inspired by B.R. Ambedkar's thoughts, as opposed to the thick conception found in the works of M.K. Gandhi, KC Bhattacharya and Ramachandra Gandhi. The author argues that political theorists of Indian politics continue to work with categories and concepts alien to the lived social and political experiences of India's common man, or

everyday people. Consequently, he emphasises the need to decolonize Indian political theory, and rescue it from the grip of western theories, and fascination with western modes of historical analysis. The necessity to avoid both universalism and relativism and more importantly address the political predicaments of ' the people ' is the key objective of the book, and a push for a reorientation of Indian political theory. An interesting new interpretation of a contemporary ideal of svaraj, this analysis takes into account influences from other cultures and sources as well as eschews thick conceptions that stifle imaginations and imaginaries. This book will be of interest to academics in the fields of philosophy, political science, sociology, literature and cultural studies in general and contemporary political theory, South Asian and Indian politics and political theory in particular.

Solutions: October 2011 Issue Disha Publications
The thoroughly Revised & Updated 3rd Edition of Objective Biology Chapter-wise MCQ for NEET/AIIMS is a collection of carefully selected MCQ's for Medical entrance exams. The book follows the pattern and flow of class 11 and 12 syllabus as

prescribed by NCERT. The unique feature of the new edition is the inclusion of new exam-centric questions and marking of questions into Critical Thinking; Toughnut & Tricky. The book contains 'Chapter-wise MCQs' which covers all the important concepts and applications required to crack the mentioned exams. The book contains 38 chapters covering a total of around 3800 MCQs with solutions. The solutions to the questions is provided immediately after the chapter. The solutions have been prepared in a manner that a student can easily understand them. This is an ideal book to practice and revise the complete syllabus of the mentioned exams. The book will help to give finishing touches to your preparation of each chapter.

Laying the Groundwork for Svaraj Concepts Of Physics Competition Science Vision Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for

medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue. Good Economics for Hard Times

The health sector is known to be one of the major contributors towards the greenhouse gas emissions causing the climate crisis, the greatest health threat of the 21st century. This volume positions the health sector as a leader in the fight against climate change and explores the role of the health system in climate policy action. It delivers an overview of the linkages between climate change and the health

sector, with chapters on the impact of climate change on health, its connection to pandemics, and its effects on food, nutrition and air quality, while examining gendered and other vulnerabilities. It delves into the different operational aspects of the health sector in India and details how each one can become climate-smart to reduce the health sector's overall carbon footprint, by looking at sustainable procurement, green and resilient healthcare infrastructure, and the management of transportation, energy, water, waste, chemicals, pharmaceuticals and plastics in healthcare. Well supplemented with rigorous case studies, the book will be indispensable for students, teachers, and researchers of environmental studies, health sciences, and climate change. It will be useful for healthcare workers, public health officials, healthcare leaders, policy planners, and those interested in climate resilience and preparedness in the healthcare sector.

Prepare for success on the 2022 CFA Level I exam with the latest official CFA® Program Curriculum. The 2022 CFA Program Curriculum Level I Box Set contains all the material you need to succeed on the Level I CFA exam in 2022. This set includes the full official curriculum for Level I and is part of the larger CFA Candidate Body of Knowledge (CBOK). Highly visual and intuitively organized, this box set allows you to: Learn from financial thought leaders. Access market-relevant instruction. Gain critical knowledge and skills. The set also includes practice questions to assist with your recall of key terms, concepts, and formulas. Perfect for anyone preparing for the 2022 Level I CFA exam, the 2022 CFA Program Curriculum Level I Box Set is a

must-have resource for those seeking the foundational skills required to become a Chartered Financial Analyst®.

Advanced Problems In Physical Chemistry For Competitive Examination Arihant Publications India limited

Cracking JEE Main & Advanced requires good command over the principles and concepts of physics and their applications to solve a variety of problems asked, irrespective of the exam format. A massive collection of the most challenging problems, the Selected Problems Series comprises of 3 books, one each for Physics, Chemistry and Mathematics to suit the practice needs of students appearing for upcoming JEE Main and Advanced exam. DC Pandey's, 500 Selected Problems in Physics aims to hone your Problem-Solving Skills on all aspects of the exam syllabi, through 16 logically sequenced chapters. Working through these chapters, you will be able to understand

Fundamentals of physics and avoid the pitfalls in applying the Concepts. The Step-by-Step solutions to the problems in the book will make you learn the time-saving strategies essential for all those appearing in JEE Main & Advanced and all other Engineering Entrance Examinations or even those who are inclined to Problem Solving in Physics *This Side of Evil* Arihant Publications India limited Our NEET Foundation series is sharply focused for the NEET aspirants. Most of the students make a career choice in the middle school and, therefore, choose their stream informally in secondary and formally in senior secondary schooling, accordingly. If you have decided to make a career in the medical profession, you need not look any further! Adopt this series for Class 9 and 10 today.

Objective Physics for NEET and Other Medical Examination has been written to build a firm foundation of the guiding principles of physics among the medical aspirants. It is mainly designed for NEET but would also be useful for other medical entrance examinations, such as AIIMS, JIPMER and state-level exams.

Objective Physics for NEET National Academies Press

The second edition of the book continues to offer a range of pedagogical features maintaining the balanced approach of the text. The attempts have been made to further strengthen the conceptual understanding by introducing more ideas and a number of solved problems. Comprehensive in approach, this text presents a rigorous treatment of organic chemistry to enable undergraduate students to learn the subject in a clear, direct, easily understandable and logical manner. Presented in a

new and exciting way, the goal of this book is to make the study of organic chemistry as stimulating, interesting, and relevant as possible. Beginning with the structures and properties of molecules, IUPAC nomenclature, stereochemistry, and mechanisms of organic reactions, proceeding next to detailed treatment of chemistry of hydrocarbons and functional groups, then to organometallic compounds and oxidation–reduction reactions, and ending with a study of selected topics (such as heterocyclic compounds, carbohydrates, amino acids, peptides and proteins, drugs and pesticides, dyes, synthetic polymers and spectroscopy), the book narrates a cohesive story about organic chemistry. Transitions between topics are smooth, explanations are lucid, and tie-ins to earlier material are frequent to maintain continuity. The book contains over 500 solved problems from simple to really challenging ones with suitable explanations. In addition, over 275 examples and solved problems on IUPAC nomenclature, with varying levels of

difficulty, are included. About Some Key Features of the Book • EXPLORE MORE: Four sets of solved problems provide in-depth knowledge and enhanced understanding of some important aspects of organic chemistry. • MINI ESSAYS: Three small essays present interesting write-ups to provide students with introductory knowledge of chemistry of natural products such as lipids, terpenes, alkaloids, steroids along with nucleic acids and enzymes. • NOTABILIA: Twenty-two 'notabilia boxes' interspersed throughout the text highlight the key aspects of related topics, varying from concepts of chemistry to the chemistry related to day-to-day life. • STRUCTURES AND MECHANISMS NOT IN ORDER: Cites examples of common errors made by students while drawing structural formulae and displaying arrows in reaction mechanisms and helps them to improve on language of organic chemistry by teaching appropriate drawings and their significance. • GLOSSARY: Includes 'Name reactions',

'Reagents', and some important terms for quick revision by students. Clearly written and logically organized, the authors have endeavoured to make this complex and important branch of science as easy as possible for students to learn from and for teachers to teach from.

Handbook for the Indian teenager to excel at JEE Springer Science & Business Media S Chand's Smart Maths is a carefully graded Mathematics series of 9 books for the children of KG to Class 8. The series adheres to the National Curriculum Framework and the books have been designed in accordance with the latest guidelines laid down by the NCERT. 2022 CFA Program Curriculum Level I Box Set Disha Publications

This handbook covers new methodological developments and applications of relativistic

quantum chemistry. It also pays attention to the foundation of relativistic quantum mechanics and addresses a number of fundamental issues that have not been covered by any book. For instance, what is the appropriate relativistic many-electron Hamiltonian? How to do relativistic explicit/local correlation? How to formulate relativistic properties? How to combine double-group and time-reversal symmetries? How to do QED calculations for molecules? Just to name a few. This book aims to establish the big picture of relativistic molecular quantum mechanics, ranging from pedagogic introduction for uninitiated readers, advanced methodologies and efficient algorithms for experts, to possible future perspectives, such that the reader knows when/how to apply/develop the methodologies. This self-contained two-volume book can be

regarded as a supplement to the three-volume "Handbook of Computational Chemistry", which contains no relativity at all. It is to be composed of 6 sections with different chapters (will be further expanded), each of which is to be written by the most active experts, who will be invited upon approval of this proposal.

Mental Ability for NTSE & Olympiad Exams for Class 10 (Quick Start for Class 6, 7, 8, & 9) 2nd Edition Little, Brown

The thoroughly Revised & Updated Mental Ability for NTSE & Olympiad Exams for Class 10 (Quick Start for Class 6, 7, 8, & 9) 2nd Edition for class 10 is a comprehensive book written exclusively for students of all states preparing for the Stage 1 of the NTSE examination. The students can start using this book right from Grade 6. The book provides learning of all the concepts involved in the

syllabus of NTSE examination for the Mental Ability Test (MAT). The book helps the students not only in building their APTITUDE but will also help in developing their ANALYTICAL SKILLS. Salient features of the book: • There are 26 chapters followed by Mock Tests for Stage 1 & 2. • The book provides sufficient point-wise theory, solved examples followed by FULLY SOLVED exercises in 2 levels Basic & Advance level. • Maps, Diagrams and Tables to stimulate the thinking ability of the student. • The book incorporates EXEMPLAR PROBLEMS IN MAT from various State NTSE exams, Stage 2 Past Questions in exercises. • The book provides 2 Mock Tests of MAT for the State NTSE and 3 for the 2nd Stage.
