At present, a nativist turn in Indian political theory can be observed. There is a general assumption that the indigenous thought to which researchers are supposed to be (re)turning may somehow be immediately visible by ignoring the colonization of the mind and polity. In such a conception of svaraj (which can be translated as ‘ authentic autonomy ’), the tradition to be returned to would be that of the indigenous elites. In this book, this

concept of svaraj is defined as a thick conception, which links it with exclusivist notions of spirituality, profound anti-modernity, exceptionalistic moralism, essentialistic nationalism and purism. However, post-independence India has borne witness to an alternative trajectory: a thin svaraj. The author puts forward a workable contemporary ideal of thin svaraj, i.e. political, and free of metaphysical commitment. The model proposed is inspired by B.R. Ambedkar's thoughts, as opposed to the thick conception found in the works of M.K. Gandhi, KC Bhattacharya and Ramachandra Gandhi. The author argues that political theorists of Indian politics continue to work with categories and concepts alien to the lived social and political experiences of India's common man, or everyday people. Consequently, he emphasises the need to decolonize Indian political theory, and rescue it from

the grip of western theories, and fascination with western modes of historical analysis. The necessity to avoid both universalism and relativism and more importantly address the political predicaments of ‘ the people ’ is the key objective of the book, and a push for a reorientation of Indian political theory. An interesting new interpretation of a contemporary ideal of svaraj, this analysis takes into account influences from other cultures and sources as well as eschews thick conceptions that stifle imaginations and imaginaries. This book will be of interest to academics in the fields of philosophy, political science, sociology, literature and cultural studies in general and contemporary political theory, South Asian and Indian politics and political theory in particular.

Principles of Biochemistry Arihant Publications India limited

An introductory textbook exploring the

subject of Lagrangian and Hamiltonian dynamics, with a relaxed and self-contained setting. Lagrangian and Hamiltonian dynamics is the continuation of Newton's classical physics into new formalisms, each highlighting novel aspects of mechanics that gradually build in complexity to form the basis for almost all of theoretical physics. Lagrangian and Hamiltonian dynamics also acts as a gateway to more abstract concepts routed in differential geometry and field theories and can be used to introduce these subject areas to newcomers. Journeying in a self-contained manner from the very basics, through the fundamentals and onwards to the cutting edge of the subject, along the way the reader is supported by all the necessary background mathematics, fully worked examples, thoughtful and vibrant illustrations as well as an informal narrative and numerous fresh, modern and inter-disciplinary applications. The book contains some unusual topics for a classical mechanics textbook. Most notable examples include the 'classical wavefunction', Koopman-von Neumann theory, classical density functional theories, the 'vakonomic' variational principle for non-holonomic constraints, the Gibbs-

Appell equations, classical path integrals, Nambu brackets and the full framing of mechanics in the language of differential geometry.

Molecular Biology of the Cell Aegitas Cracking JEE Main & Advanced requires good command over the principles and concepts of physics and their applications to solve a variety of problems asked, irrespective of the exam format. A massive collection of the most challenging problems, the Selected Problems Series comprises of 3 books, one each for Physics, Chemistry and Mathematics to suit the practice needs of students appearing for upcoming JEE Main and Advanced exam. DC Pandey's, 500 Selected Problems in Physics aims to hone your Problem-Solving Skills on all aspects of the exam syllabi, through 16 logically sequenced chapters. Working through these chapters, you will be able to understand Fundamentals of physics and avoid the pitfalls in applying the Concepts. The Step-by-Step solutions to the problems in the book will make you learn the time-saving strategies essential for all those appearing in JEE Main & Advanced and all other Engineering Entrance Examinations or even those who are inclined to Problem Solving in Physics

1. Best-selling study guide and well-structured study resource for NEET, AIIMS, JIPMER.
2. NEET Objective Physics Vol 1. – for class 11
3. The book follows the NCERT pattern for MBBS & BDS entrance preparation along with their school studies.
4. Diagrams, tables, figures etc support theory
5. Practice exercises after every chapter
6. Coverage of last 8 Years Questions of NEET, CBSEE AIPMT and Other Medical Entrances. The “ NEET Objective Physics Volume – 01 ” is a complete comprehensive book designed for the medical students preparing for NEET. As the title suggests the volume -1 covers the complete NEET syllabus along with NCERT Textbook of class 11th into 17 Chapters for the simultaneous preparation of both school & exam. Every chapter is well supported by theories, diagrams, tables, figures. Important points and Notes are given in the topics to enrich students. In order to help, Check Point Exercises are given in between the text of all chapters to make students linked with the topic. Solved Examples are given with the different concepts of chapters to make students learn the problem solving skills. Exercises provided in the chapters are divided into 3 parts. Part – A: Taking it Together deals with objective questions arranged according to level of difficulty for the systematic practice. Part – B:

Medical Entrance Special Format Questions – covers all special types of questions, generally asked in NEET & other Medical Entrances, Part – C: Medical Entrances ' Gallery – asked questions in Last 10 years ' (2020-2011) in NEET and other medical entrances. TOC Basic Mathematics, Units, Dimensions and Error Analysis, Vectors, Motion in One Dimension, Motion in a Plane and Projectile Motion, Laws of Motion, Work, Power and Energy, Circulation Motion, Rotation, Gravitation, Simple Harmonic Motion, Elasticity, Fluid Mechanics, Thermometry, Thermal Expansion and Kinetic Theory of Gases, Laws of Thermodynamics, Calorimetry and Heat Transfer, Wave Motion.

Crop Plant John Wiley & Sons
The global financial crisis, a scandal-ridden business world and a deeply unstable business environment: all of it means that trust in businesses, and business leaders, is at an all-time low. At the same time, global supply chains in major corporations have become more complex and exposed to risks, as organizations have sought to make use of cheaper production opportunities in poorer

countries, leaving their global brands exposed to uncertain practices around the world; we are in need of a new kind of leadership. There is a growing disconnect between the way large corporations would like to see the world and what is happening in reality, and the problem lies at least partly in the way that these organizations are being led. The Reconnected Leader evaluates the current situation and sets out an eight-step model to implementing new leadership practices that help managers reconnect with their teams and reset the relationship the business has with all its stakeholders. It is up to leaders to set long-term goals that, if achieved, will create lasting value for businesses and for the communities they serve. Drawing on case studies from international organizations and a sound theoretical underpinning, thought leader

Norman Pickavance argues that the solution lies with leaders. The Reconnected Leader invites readers on a journey to rediscover the true purpose of their business and find more innovative leadership solutions that integrate the challenge of long-term societal needs and short-term financial results. Prepare for success on the 2022 CFA Level I exam with the latest official CFA® Program Curriculum. The 2022 CFA Program Curriculum Level I Box Set contains all the material you need to succeed on the Level I CFA exam in 2022. This set includes the full official curriculum for Level I and is part of the larger CFA Candidate Body of Knowledge (CBOK). Highly visual and intuitively organized, this box set allows you to: Learn from financial thought leaders. Access market-relevant instruction. Gain critical knowledge and skills. The set also includes practice questions to assist with your recall of key terms, concepts, and formulas. Perfect for anyone

preparing for the 2022 Level I CFA exam, the 2022 CFA Program Curriculum Level I Box Set is a must-have resource for those seeking the foundational skills required to become a Chartered Financial Analyst®.

The Book Thoroughly The Following: Physical Chemistry With Detailed Concepts And Numerical Problems. Organic Chemistry With More Chemical Equations. Inorganic Chemistry

With Theory And Examples. In Addition To A Well Explained Theory The Book Includes Well Categorized Classified And Sub-Classified Questions On The Basis Of Latest Trends Of Examination Papers. Salient Features As Per The Syllabus Of Engineering And Medical Entrance Examinations Previous Years Solved Papers Every Unit Contains (I) Main Highlights; (Ii) Multiple Choice Questions; (Iii) True And False Statements; (Iv) Hints And Solutions.

Lakhmir Singh's Science for Class 8 Little, Brown

This book provides us a thorough overview of Crop Plant with current advance in research. Divided into two section based on the chapters contents. Chapter 1 provides information about markers and next generation sequencing technology and its use. Chapter 2 is about how we can use Silicon for Drought

tolerance. Chapter 3 is to deal with the major problem of rising CO₂ and O₃ causing environmental pollution. Chapter 4 covers the phenomena of RNAi and its use, application in crop science. Chapter 5 is a review for boron deficiency in soils and how to deal with it for better crops. Chapter 6-10 provide some information regarding recent works going on in crop science.

1. 14 Years' Solved Papers is collection of previous years solved papers of NEET 2. This book covers all CBSE AIPMT and NTA NEET papers 3. Chapterwise and Unitwise approach to analysis questions 4. Each question is well detailed answered to understand the concept as whole 5. Online access to CBSE AIPMT SOLVED PAPER (Screening + Mains) 2008 When preparing for an examination like NEET, the pattern and the question asked in the examination are always intriguing for aspirants. This is where Solved Papers play their major role in helping students to cope up with the attempting criteria of the exam. Presenting the "14 Years' Solved Papers [2011 - 2008]" that has been designed with a structured approach as per the latest NEET Syllabus requirement. As the title of the book suggests, it contains ample previous year's papers, which help to identify and self-analyze the preparation level for the exam. Enriched with problem solving tools, this book serves a one stop solution for all 3 subjects; Physics, Chemistry and

Biology. Well detailed answers are given for all questions that provide deep conceptual understanding of the problems. This book can be treated as a sufficient tool for learning, active answering style and time management skills. What is the nation? What is the idea of India? Whose India is it, anyway? This inaugural volume in the series titled Rethinking India aims to kickstart a national dialogue on the key questions of our times. It brings together India's foremost intellectuals, academics, activists, technocrats, professionals and policymakers to offer an in-depth exploration of these issues, deriving from their long-standing work, experience and unflinching commitment to the collective idea of India, of who we can and ought to be. Vision for

a Nation: Paths and Perspectives champions a plural, inclusive, just, equitable and prosperous India, committed to individual dignity as the foundation of the unity and vibrancy of the nation. In order to further disseminate these ideas-the vision for the nation as aspirationally reflected in the Constitution-this book provides a positive counter-narrative to reclaim the centrality of a progressive, deeply plural and forward-looking and inclusive India. It serves as a fresh reminder of our shared and shareable overlapping values and principles, and collective heritage and resources. The essays in the book are meaningful to anyone with an interest in contemporary Indian politics, South Asian studies, modern Indian history, law, sociology, media and journalism.

Outlook TeacherNi (SDEE) Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook

version does not contain CD.

Vision Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in

every monthly issue. Development Challenges, South-South Solutions: October 2011 Issue
This book unveils forestry science and its policy and management that connect past and present understanding of forests. The aggregated knowledge is presented to cover the approaches adopted in studying forest structure, its growth, functioning, and degradation, especially in the context of the surrounding environment. The application of advance computation, instrumentation, and modelling has been elaborated in various chapters. Forest ecosystems are rapidly changing due to forest fires, deforestation, urbanization, climate change, and other natural and anthropogenic drivers. Understanding the dynamics of forest ecosystems requires

contemporary methods and measures, utilizing modern tools and big data for developing effective conservation plans. The book also covers discussion on policies for sustainable forestry, agroforestry, environmental governance, socio-ecology, nature-based solutions, and management implication. It is suitable for a wide range of readers working in the field of scientific forestry, policy making, and forest management. In addition, it is a useful material for postgraduate and research students of forestry sciences.
