Our NEET Foundation series is sharply

focused for the NEET aspirants. Most of
the students make a career choice in the
middle school and, therefore, choose their
stream informally in secondary and
formally in senior secondary schooling,
accordingly. If you have decided to make
a career in the medical profession, you
need not look any further! Adopt this
series for Class 9 and 10 today.

with all the important formulae and
concepts 4. This book for JEE, NEET &
Class 11/12 exam Short notes for last
minute revision are very important as
we don't have time to revise the entire

syllabus. At the same time continuous
revision of formulae and main concepts
are equally important. Presenting,
“Physics Quick Book” a reference book
which is designed for the last minute
preparation for JEE, NEET & Class
11/12 exam. It is divided into 22
different chapters, where every chapter
is provided with quick short notes and
listed with important formulae so that no
student should skip any important
chapter. Emphasizing on each chapter
covers all the important formulae,
concepts in a lucid and concise manner.
This is a must have book for the quick
revision at the last moment. TOC

Medical Device Regulations: A Complete Guide describes a brief review of various regulatory bodies of major developed and developing countries around the world. The book covers the registration procedures of medical devices for pharmaceutical regulatory organizations. Sections provide guidance on dealing with the ethical considerations of medical device development, compliance with patient confidentiality using information from medical devices, the interoperability between, and among devices outside of

healthcare, and the dynamics of implementation of new devices to ensure patient safety. The author brings forth relevant issues, challenges and demonstrates how management can foster increased clinical and non-clinical relations to enhance patient outcomes and the bottom-line by demystifying the regulatory impact on operational requirements. Provides clear information on regulatory pathways for the design and commercialization of Medical Devices in different countries Explains the difference between standards and mandatory regulations for each region, along with discussions of regulations from USFDA (USA), CDSCO (India), EMEA (European Union), SFDA (China) and PMDA (Japan) Compiles regulations for medical devices and pharmaceuticals worldwide, helping readers create globally compliant products

The Iliad is an ancient Greek epic poem in dactylic hexameter, traditionally attributed to Homer. Set during the Trojan War, the ten-year siege of the city of Troy (Ilium) by a coalition of Greek states, it tells of the battles and events during the weeks of a quarrel between King Agamemnon and the warrior Achilles.

The global financial crisis, a scandal-ridden business world and a deeply unstable business environment: all of it means that trust in businesses, and business leaders, is at an all-time

low. At the same time, global supply chains in major corporations have become more complex and exposed to risks, as organizations have sought to make use of cheaper production opportunities in poorer countries, leaving their global brands exposed to uncertain practices around the world; we are in need of a new kind of leadership. There is a growing disconnect between the way large corporations would like to see the world and what is happening in reality, and the problem lies at least partly in the way that these organizations are being led. The Reconnected Leader evaluates the current situation and sets out an eight-step model to implementing new leadership practices that help managers reconnect with their teams and reset the relationship

the business has with all its stakeholders. It is up to leaders to set long-term goals that, if achieved, will create lasting value for businesses and for the communities they serve. Drawing on case studies from international organizations and a sound theoretical underpinning, thought leader Norman Pickavance argues that the solution lies with leaders. The Reconnected Leader invites readers on a journey to rediscover the true purpose of their business and find more innovative leadership solutions that integrate the challenge of long-term societal needs and short-term financial results.

Cloud Computing and Big Data technologies have become the new descriptors of the digital age. The global amount of digital data has increased more than nine times in volume in just five years and by 2030 its volume may reach a staggering 65 trillion gigabytes. This explosion of data has led to opportunities and transformation in various areas such as healthcare, enterprises, industrial manufacturing and transportation. New Cloud Computing and Big Data tools endow researchers and analysts with novel techniques and opportunities to collect, manage and analyze the vast quantities of data. In Cloud and Big Data Analytics, the two areas of Swarm Intelligence and

Deep Learning are a developing type of Machine Learning techniques that show enormous potential for solving complex business problems. Deep Learning enables computers to analyze large quantities of unstructured and binary data and to deduce relationships without requiring specific models or programming instructions. This book introduces the state-of-the-art trends and advances in the use of Machine Learning in Cloud and Big Data Analytics. The book will serve as a reference for Data Scientists, systems architects, developers, new researchers and graduate level students in Computer and Data science. The book will describe the concepts necessary to understand current Machine Learning issues, challenges and possible solutions as well as

upcoming trends in Big Data Analytics.

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward

multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

As society continues to rely heavily on technological tools for facilitating business, e-commerce, banking, and communication, among other applications, there has been a significant rise in criminals seeking to exploit these tools for their nefarious gain. Countries all over the world

are seeing substantial increases in identity theft and cyberattacks, as well as illicit transactions, including drug trafficking and human trafficking, being made through the dark web internet. Sex offenders and murderers explore unconventional methods of finding and contacting their victims through Facebook, Instagram, popular dating sites, etc., while pedophiles rely on these channels to obtain information and photographs of children, which are shared on hidden community sites. As criminals continue to harness technological advancements that are outpacing legal and ethical standards, law enforcement and government officials are faced with the challenge of devising new and alternative strategies to identify and apprehend criminals to preserve the safety of society. The Encyclopedia of Criminal Activities and the Deep Web is

a three-volume set that includes comprehensive articles covering multidisciplinary research and expert insights provided by hundreds of leading researchers from 30 countries including the United States, the United Kingdom, Australia, New Zealand, Germany, Finland, South Korea, Malaysia, and more. This comprehensive encyclopedia provides the most diverse findings and new methodologies for monitoring and regulating the use of online tools as well as hidden areas of the internet, including the deep and dark web. Highlighting a wide range of topics such as cyberbullying, online hate speech, and hacktivism, this book will offer strategies for the prediction and prevention of online criminal activity and examine methods for safeguarding internet users and their data from being tracked or stalked. Due to the techniques and extensive

knowledge discussed in this publication it is an invaluable addition for academic and corporate libraries as well as a critical resource for policy makers, law enforcement officials, forensic scientists, criminologists, sociologists, victim advocates, cybersecurity analysts, lawmakers, government officials, industry professionals, academicians, researchers, and students within this field of study.
