Mental Arithmetic | ALOHA

Soroban is the name of Japanese abacus which has 1 beads on the higher deck and 4 beads on the lower deck. It is modified from the ancient Chinese abacus. The ancient Chinese abacus had 2 beads on the higher deck and 5 beads on the lower deck – this is referred to as the 2:5 system. By manipulating the beads, complex arithmetic calculations such as addition, subtraction, multiplication, division and finding the square root could be carried out efficiently and accurately.

faq | Fun With Abacus

Abacus-Mental Arithmetic first involves learning how to use the abacus to do addition and subtraction sums. Equipping with the knowledge of using the abacus to solve arithmetic sums, they will learn how to visualise the movement of the beads in their minds. Using this imagination, they will gradually learn to solve addition, subtraction, multiplication and division sums mentally at a fast speed.
