The Essentials of World Languages, Grades K-12 Paul H Brookes Publishing Company

This book examines the many roles of families in their members' food access, preferences, and consumption. It provides an overview of factors – from micro- to macro-levels – that have been linked to food insecurity and discusses policy approaches to reducing food insecurity and hunger. In addition, it addresses the links between food insecurity and overweight and obesity. The book describes changes in the U.S. food environment that may explain increases in obesity during recent decades. It explores relationships between parenting practices and the development of eating behaviors in children, highlighting the importance of family mealtimes in healthful eating. The volume provides an overview of efforts to prevent or reduce obesity in children, with attention to minority populations and discusses research findings on targets for obesity prevention, including a focus on fathers as change agents who play a crucial, yet understudied, role in food parenting. The book acknowledges that with the current obesogenic environment in the United States and elsewhere around the world, additional and innovative efforts are needed to foster healthful eating behavior and orientations toward food in childhood and in families. This book is a must-have resource for researchers, professors, clinicians, professionals, and graduate students in developmental psychology, family studies, public

health as well as numerous interrelated disciplines, including sociology, demography, social work, prevention science, educational policy, political science, and economics.

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the

leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Indigenous Women and Violence McGraw Hill Professional

Indigenous Women and Violence offers an intimate view of how settler colonialism and other structural forms of power and inequality created accumulated violences in the lives of Indigenous women. This volume uncovers how these Indigenous women resist violence in Mexico, Central America, and the United States, centering on the topics of femicide, immigration, human rights violations, the criminal justice system, and Indigenous justice.

Taking on the issues of our times, Indigenous Women and Violence calls for the deepening of collaborative ethnographies through community engagement and performing research as an embodied experience. This book brings together settler colonialism, feminist ethnography, collaborative and activist ethnography, emotional communities, and standpoint research to look at the links between structural, extreme, and everyday violences across time and space. Indigenous Women and Violence is built on engaging case studies that highlight the individual and collective struggles that Indigenous women face from the racial and gendered oppression that structures their lives. Gendered violence has always been a part of the genocidal and assimilationist projects of settler colonialism, and it remains so today. These structures—and the forms of violence inherent to them—are driving criminalization and victimization of Indigenous men and women, leading to escalating levels of assassination, incarceration, or transnational displacement of Indigenous people, and especially Indigenous women. This volume brings together the potent ethnographic research of eight scholars who have dedicated their careers to illuminating the ways in which Indigenous women have challenged communities, states, legal systems, and social movements to promote gender justice. The chapters in this book are engaged, feminist, collaborative, and activism focused, conveying powerful messages about the resilience and resistance of Indigenous women in the face of violence and systemic oppression.

Dance and the Arts in Mexico, 1920 – 1950 tells the story of the arts explosion that launched at the end of the Mexican revolution, when composers, choreographers, and muralists had produced state-sponsored works in wide public spaces. The book assesses how the “cosmic generation” in Mexico connected the nation-body and the dancer’s body in artistic movements between 1920 and 1950. It first discusses the role of dance in particular, the convergences of composers and visual artists in dance productions, and the allegorical relationship between the dancer's body and the nation-body in state-sponsored performances. The arts were of critical import in times of political and social transition, and the dynamic between the dancer’s body and the national body shifted as the government stance had also shifted. Second, this book examines more deeply the involvement of US artists and patrons in this Mexican arts movement during the period. Given the power imbalance between north and south, these exchanges were vexed. Still, the results for both parties were invaluable. Ultimately, this book argues in favor of the benefits that artists on both sides of the border received from these exchanges.

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority

Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRA Terre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

In this impressive 'verse legend' Espronceda creates an original interpretation of the famous Don Juan legend whereby he produces a Romantic 'counter-text' which gives voice to what we now recognise as a central part of the modern philosophical condition: the Romantic vision of an all-pervasive cosmic injustice. Professor Cardwell, in his introduction, shows how in the person of

Felix de Montemar, Espronceda has created one of Europe's first rebellious literary heroes, standing alone, noble and defiant, in the face of all the evil and pain in the world. Thus Espronceda takes his place alongside other major European Romantic writers; Byron, Lermontov, Heine, Vigny, Leopardi and Mickiewitz; expressing, as they do, man's existential protest, noblest ideals and his modern sense of human condition which directly informs our own twentieth century literary achievements. Davies' meticulous translation of this poem, mirroring the metrical and stylistic virtuosity of Espronceda's original, presents it for the first time to English readers, since its composition 150 years ago.

Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In Land of Necessity, historians and anthropologists unravel the interplay of the national and transnational and of scarcity and abundance in the region split by the 1,969-mile boundary line dividing Mexico and the United States. This richly illustrated volume, with more than 100 images including maps, photographs, and advertisements, explores the convergence of broad demographic, economic, political, cultural, and transnational developments resulting in various forms of consumer culture in the borderlands. Though its importance is uncontested, the role of necessity in consumer culture has rarely been explored. Indeed, it has been argued that where necessity reigns, consumer culture is anemic. This volume demonstrates otherwise. In doing so, it sheds new light on the history of the U.S.-Mexico borderlands, while also opening up similar terrain for scholarly inquiry into consumer culture. The volume opens with two chapters that detail the historical trajectories of consumer culture and the borderlands. In the subsequent chapters, contributors take up subjects including smuggling, tourist districts and resorts, purchasing power, and living standards. Others address home décor, housing, urban development, and commercial real estate, while still others consider the circulation of cinematic images, contraband, used cars, and clothing. Several contributors discuss the movement of people across borders, within cities, and in retail spaces. In the two afterwords, scholars reflect on the U.S.-Mexico borderlands as a particular site of trade in labor, land, leisure, and commodities, while also musing about consumer culture as a place of complex political and economic negotiations.

Through its focus on the borderlands, this volume provides valuable insight into the historical and contemporary aspects of the big "isms" shaping modern life: capitalism, nationalism, transnationalism, globalism, and, without a doubt, consumerism.
