Written for Higher Education educators, managers and policy-makers, Plagiarism, the Internet and Student Learning combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of plagiarism in academic writing.

The Psychology of Mattering: Understanding the Human Need to be Significant is the first comprehensive examination of mattering that is discussed in terms of associated motives, cognitions, emotions and behaviors. As mattering involves the self in relation to other people, the book tackles key relational themes of internal working models of attachment, transactional processes, and more. Extensive analysis from a conceptual perspective is balanced by a similar analysis of mattering from an applied perspective, specifically the relevance of mattering in clinical and counseling contexts, in assessment and treatment. The book is supported by recent empirical advances making it an authoritative text on the psychology of mattering that will heighten awareness of mattering by informing academic scholars and the general public. Defines mattering and its various facets Explains the importance of mattering in predicting key life outcomes Provides a narrative perspective on the importance of mattering in people's lives Discusses mattering in terms of self-esteem, perfectionism, self-compassion, and vulnerabilities and resilience Describes assessment scales for measuring mattering Details links between mattering and anxiety, depression and suicide

Academia's Digital Voice: A Conversation on 21st Century Higher Education provides critical information on an area that needs particular attention given the rapid introduction and immersion into digital technologies that took place during the pandemic, including quality assurance and assessment. Sections discuss the rapid changes called into question as student mobility, pedagogical readiness of academics, technological readiness of institutions, student readiness to adopt online learning, the value of higher education, the value of distance learning, and the changing role of administration and faculty were thrust upon institutions. The unprecedented speed of international lockdowns caused by the pandemic necessitated HEIs to make rapid changes in both teaching and assessment approaches. The quality of these and sacrosanctity of the academic voice has long been the central tenet of higher education. While history is replete with challenges to this, the current, rapid shift to online education may represent the greatest threat and opportunity so far. Focuses on the academic voice in HEI Presents an authentic message and mode for the new world we live in post COVID Includes a section on academic predictions for higher education institutions

All students and professors need to write, and many struggle to finish their stalled dissertations, journal articles, book chapters, or grant proposals. Writing is hard work and can be difficult to wedge into a frenetic academic schedule. In this practical, light-hearted, and encouraging book, Paul Silvia explains that writing productively does not require innate skills or special traits but specific tactics and actions. Drawing examples from his own field of psychology, he shows readers how to overcome motivational roadblocks and become prolific without sacrificing evenings, weekends, and vacations. After describing strategies for writing productively, the author gives detailed advice from the trenches on how to write, submit, revise, and resubmit articles, how to improve writing quality, and how to write and publish academic work.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines.

Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

"[A] stunning tale of academic fraud . . . shocking and compelling."-The Washington Post  
Dave Tomar wrote term papers for a living. Technically, the papers were "study guides," and the companies he wrote for-there are quite a few-are completely aboveboard and easily found with a quick web search. For as little as ten dollars a page, these paper mills provide a custom essay, written to the specifics of any course assignment. During Tomar's career as an academic surrogate, he wrote made-to-order papers for everything from introductory college courses to Ph.D. dissertations. There was never a shortage of demand for his services. *The Shadow Scholar* is the story of this dubious but all-too-common career. In turns shocking, absurd, and ultimately sobering, Tomar explores not merely his own misdeeds but the bureaucratic and cash-hungry colleges, lazy students, and even misguided parents who help make it all possible.
