Learning from the Lived Experiences of Graduate Student Writers is a timely resource for understanding and resolving some of the issues graduate students face, particularly as higher education begins to pay more critical attention to graduate student success. Offering diverse approaches for assisting this demographic, the book bridges the gap between theory and practice through structured examination of graduate students' narratives about their development as writers, as well as researched approaches for enabling these students to cultivate their craft. The first half of the book showcases the voices of graduate student writers themselves, who describe their experiences with graduate school literacy through various social issues like mentorship, access, writing in communities, and belonging in academic programs. Their narratives illuminate how systemic issues significantly affect graduate students from historically oppressed groups. The second half accompanies these stories with proposed solutions informed by empirical findings that provide evidence for new practices and programming for graduate student writers.

Learning from the Lived Experiences of Graduate Student Writers values student experience as an integral part of designing approaches that promote epistemic justice. This text provides a fresh, comprehensive, and essential perspective on graduate writing and communication support that will be useful to administrators and faculty across a range of disciplines and institutional contexts. There is no singular 'best' method of research. The differing nature of various research endeavors warrant multiple ways of generating knowledge, sharing knowledge, and more importantly, avoiding errors. More recently, the dichotomy between quantitative and qualitative approaches has begun to dissolve as the integrated approach of mixed methods gains popularity. *Scholarly Publishing and Research Methods Across Disciplines* is a collection of innovative findings on the methods and applications of research in scholarly publishing, ranging from the analyzation of mixed methods and qualitative/quantitative research, to Dewey's scientific method and more. Highlighting a range of topics including higher education, digital divide, and model development, this publication applies a cross-disciplinary viewpoint that will appeal to researchers, graduate students, academicians, librarians, scholars, and industry-leading experts around the globe seeking an understanding of the limitations and strengths in research techniques.

Writing for the Humanities Columbia University Press

Providing practical and theoretical chapters on academic library services for graduate students, this volume helps information professionals support this often-overlooked campus population to address their multiple roles and identities as students and as future faculty members or professionals. As more and more students attend graduate

programs, many higher education institutions have established professional development programs to help graduate students learn the wide range of skills needed to be successful as both students and as future professionals or academics. To presuppose that graduate students are proficient library users is a mistake. Graduate students need and want help, and many libraries are now offering specialized services for this diverse population. Contributors to this edited volume provide case studies and practical advice on academic library services for graduate students that support their multiple roles on campus and address the complex social and emotional issues related to their other roles as parents, working adults, caretakers, and more. As academic libraries shift from functioning primarily as collections repositories to collaborating as key players in discovery and knowledge creation, value-added services for graduate students are even more central to libraries' changing missions. This book makes an important contribution to the ongoing professional conversation and is a useful tool for librarians who want to better support graduate students at their institutions. Provides case studies and practical advice for specialized library services for an often-overlooked academic population Highlights innovative designs for instructional and outreach programming, as well as physical library spaces, that target the needs of graduate students Describes best practices for tailoring library services to the unique needs of graduate students with divergent career goals Demonstrates how academic librarians can contribute to lifelong learning and workplace information literacy by supporting graduate students, not only as students but also as future academics and professionals Details collaborative endeavors that result in services and programming which address the holistic needs of 21st-century graduate students

Academic Writing and Grammar for Students University Press of America

From Student to Scholar guides graduate students through the "hidden" developmental transition required in writing a dissertation and moving beyond, to become a successful scholar. Identifying common rhetorical challenges across disciplines, author Hjortshoj explains how to accommodate evolving audiences, motivations, standards, writing processes, and timelines. One full chapter is devoted to "writing blocks," and another offers advice to international students who are non-native speakers of English. The text also offers advice for managing relations with advisors and preparing for the diverse careers that PhDs, trained primarily as research specialists, actually enter. On the basis of more than thirty years of consultations with graduate students, this volume is an important addition to graduate thesis seminars and composition courses, as well as an invaluable reference for writing centers, workshops, and learning support centers.

For Korean Writers ABC-CLIO

Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

The Professor Is In Routledge

This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to:

- increase their motivation, focus, and persistence to move a project to completion
- overcome procrastination and perfectionistic tendencies
- reduce (or write in spite of) their anxiety and fear of writing
- manage their time, work, energy (and advisor) for greater productivity

The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies, leaving most at sea about how to start a practice that is central to a career in academe and vital in many other professional occupations. This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv. While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters — each devoted to a specific strategy or writing challenge — each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add.

Writing Your Dissertation in Fifteen Minutes a Day SAGE

Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

Research, Curriculum, and Program Design Holt Paperbacks

Using rich examples and engaging pedagogical tools, this book equips students to master the challenges of academic writing in graduate school and beyond. The authors delve into nitty-gritty aspects of structure, style, and language, and offer a window onto the thought processes and strategies that strong writers rely on. Essential topics include how to: identify the audience for a particular piece of writing; craft a voice appropriate for a discipline-specific community of practice; compose the sections of a qualitative, quantitative, or mixed-methods research article; select the right peer-reviewed journal for submitting an article; and navigate the publication process. Readers are also guided to build vital self-coaching skills in order to stay motivated and complete projects successfully.

User-Friendly Features

- *Exercises (with answers) analyzing a variety of texts.
- *Annotated excerpts from peer-reviewed journal articles.
- *Practice opportunities that help readers apply the ideas to their own writing projects.
- *Personal reflections and advice on common writing hurdles.
- *End-of-chapter Awareness and Action Reminders with clear steps to take.

There are many books to help Korean students write in English, but few deal with writing at the scholarly level. This is a book which deals with academic research paper writing and is designed primarily for Korean post-secondary writers. This book introduces and explains to the undergraduate or graduate student how to better plan, research, write, and edit an argument paper, thesis, or journal publication in MLA or APA format. While it is tailored to Hanyang University students, the information here is meant to be helpful for a broad audience of writers.
