With the recent content update of 2021, it is more important that the PMP aspirant's mindset needs to be more agile and focused on the project life cycle with an understanding of broader concepts. The book is updated to ensure that it is aligned with the latest update of the PMP exam content outline for 2021. The new exam is 180 questions with two breaks of 10 mins each. That would mean that the exam is divided into three sections having 60 questions each. Each section is independent and has to be attempted as full. Once a section is closed, you can not come back to it to review. The result of the exam is displayed only after the third section, i.e., section C. The questions are changed to multi-answer, drag, and drop, and TRUE/FALSE. All those changes are reflected in the new book. You have the best resource for the PMP examination preparation. Go ahead and start the 21 Days plan. The 21 days plan is given for the preparation - kindly follow to get the best outcome. This book is written with the assumption that you have gone through the 35 PDU course. The book is primarily written to revise the topics and evaluate your knowledge and build the missing pieces if any. The book does not have 3 full-length questions, and you can check lms.kavisharma.net to get the full-length questions (buy them) or use any other question bank. The idea is to practice as many questions as possible to simulate the PMP exam before the final exam. With this, I wish you success. You have an excellent resource with you, follow the plan, and you will be successful. All the best. Kavita Sharma - Significant Contributor PMBOK

Part II, "Anti-Money Laundering and Combating Terrorist Financing (AML/CTF)" and Part III, "Criminal and Civil Forfeiture," evaluate the judicial and legislative structures of the country. Given the increasing global dimension of AML/CTF activities, these sections give special attention to how a country has created statutes, decisions, policies and the judicial enforcement procedures needed to combat money laundering and terrorist financing. Part IV, "Compliance," examines the most critical processes for the prevention and detection of money laundering and terrorist financing. This section reflects on the practical elements that should be in place so that financial institutions can comply with AML/CTF requirements; these are categorized into the development and implementation of internal controls, policies and procedures. Part V, "International Cooperation," reviews the compilation of international laws and treaties between countries working together to combat money laundering and terrorist financing. Anti – Money Laundering in a Nutshell is a concise, accessible, and practical guide to compliance with anti – money laundering law for financial professionals, corporate

investigators, business managers, and all personnel of financial institutions who are required, under penalty of hefty fines, to get anti – money laundering training. Money laundering is endemic. As much as 5 percent of global GDP (\$3.6 trillion) is laundered by criminals each year. It ' s no wonder that every financial institution in the United States—including banks, credit card companies, insurers, securities brokerages, private funds, and money service businesses—must comply with complex examination, training, and reporting requirements mandated by a welter of federal anti – money laundering (AML) laws. Ignorance of crime is no excuse before the law. Financial institutions and businesses that unknowingly serve as conduits for money laundering are no less liable to prosecution and fines than those that condone or abet it. In **Anti – Money Laundering in a Nutshell: Awareness and Compliance for Financial Personnel and Business Managers**, Kevin Sullivan draws on a distinguished career as an AML agent and consultant to teach personnel in financial institutions what money laundering is, who does it, how they do it, how to prevent it, how to detect it, and how to report it in compliance with federal law. He traces the dynamic interplay among employees, regulatory examiners, compliance officers, fraud and forensic accountants and technologists, criminal investigators, and prosecutors in following up on reports, catching launderers, and protecting the integrity and reputations of financial institutions and businesses. In particular, corporate investigators will gain rich insights winnowed from the author's experiences as a New York State and federal investigator.
