qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. The P1 Professional Accountant exam is based on the themes of professionalism, responsibility and accountability. The syllabus emphasises what is important for a well-run organisation and illustrates the factors underpinning professional behaviour by accountants: \* Corporate governance arrangements should ensure that the organisation functions smoothly and directors and managers are accountable \* Corporate governance requires

sound systems of internal control and risk management \* Accountants should think carefully about what their ethical positions are and what views of society their professional opinions support \* Accountants and businesses should be aware of the social and environmental impacts their activities have. The examiner-reviewed Study Text provides everything you need to know for P1. It explains the theories behind the key areas of corporate governance and ethics, and demonstrates how the theories translate into practice. The Text gives lots of examples of the risks organisations face. It also shows how businesses are coping with their wider social responsibilities,

which the examiner has highlighted as very important. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

Elementary Differential  
Geometry focuses on the  
elementary account of the  
geometry of curves and  
surfaces. The book first offers  
information on calculus on  
Euclidean space and frame  
fields. Topics include structural  
equations, connection forms,  
frame fields, covariant  
derivatives, Frenet formulas,

curves, mappings, tangent  
vectors, and differential forms.  
The publication then examines  
Euclidean geometry and  
calculus on a surface.  
Discussions focus on topological  
properties of surfaces,  
differential forms on a surface,  
integration of forms,  
differentiable functions and  
tangent vectors, congruence of  
curves, derivative map of an  
isometry, and Euclidean  
geometry. The manuscript  
takes a look at shape operators,  
geometry of surfaces in  $E$ , and  
Riemannian geometry.  
Concerns include geometric  
surfaces, covariant derivative,

curvature and conjugate points, Gauss-Bonnet theorem, fundamental equations, global theorems, isometries and local isometries, orthogonal coordinates, and integration and orientation. The text is a valuable reference for students interested in elementary differential geometry.
