In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount Pinatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the

surrounding areas during June and July 1991.

"Jude has spent the whole twenty one years of his life running. From what, he wasn't quite sure. His mother tried to keep him safe; a low profile, a constant move on the horizon, a week's pay always stashed away. She tried to instill in him that he was special somehow. He never felt different. He was so completely normal and vanilla that he wondered if it had all been in her head. But then she was murdered and all he saw was a running silhouette of a man as his mother said three final words to him. Three words that changed his whole being. Never stop running... Now he's semi-settled into a big town. The college is huge and easy to blend into. It's been three months since he had to move because 'Biloxi', as he calls the man who killed his mother, found him once more. Then Marley, an eighteen year old girl who is as infuriating as she is blissfully ignorant of her gorgeousness, smashes into his car with hers. Then smashes into his life as he realizes that whatever it is he has that Biloxi wants, she has it, too. And now,

they're after them both."--Page 4 of cover.

These collected papers are critical reflections about the rapid digitalization of discourse and culture. This disruptive change in communicative interaction has swept rapidly through major universities, nation states, learned disciplines, leading businesses, and government agencies during the past decade. To commemorate the tenth anniversary of the Center for Digital Discourse and Culture (CDDC) at Virginia Tech, which has been a pioneering leader for many of these changes in university settings, the contributors to this volume examine the transformative implications of digitalizing discourse and culture inside and outside of the academic arena. These technologies of digitalization have created new communities of users, which are highly engaged with their new communicative possibilities, informational content, and discursive forms. Few have asked

what these changes will mean, and many of the most important voices engaged in debates about this critical transformation are gathered here in this volume. Each author in his or her own way considers what accepting digital discourse and informational culture now means for contemporary economies, governments, and societies.

Across the globe, Google, Amazon, Facebook, Apple and Microsoft have accumulated power in ways that existing regulatory and intellectual frameworks struggle to comprehend. A consensus is emerging that the power of these new digital monopolies is unprecedented, and that it has important implications for journalism, politics, and society. It is increasingly clear that democratic societies require new legal and conceptual tools if they are to adequately understand, and if necessary check the economic might of these companies. Equally, that we need to better comprehend the ability of such firms to control personal data and to shape the flow of news, information, and public opinion. In this volume, Martin Moore and Damian Tambini draw together the world's leading researchers to examine the digital dominance of technologies platforms and look at the evidence behind the rising tide of criticism of the tech

giants. In fifteen chapters, the authors examine the economic, political, and social impacts of Google, Amazon, Facebook, Apple, and Microsoft, in order to understand the different facets of their power and how it is manifested. Digital Dominance is the first interdisciplinary volume on this topic, contributing to a conversation which is critical to maintaining the health of democracies across the world.

Why did the novel become so popular in the past three centuries, and how did the American novel contribute to this trend? As a key provider of the narrative frames and formulas needed by modern individuals to give meaning and mooring to their lives. Drawing on phenomenological hermeneutics, human geography and social psychology, Laura Bieger contends that belonging is not a given; it is continuously produced by narrative. Against the current emphasis on metaphors of movement and destabilization, she explores the salience and significance of home. Challenging views of narrative as a mechanism of

---

ideology, she approaches narrative as a practical component of dwelling in the world - and the novel a primary place-making agent. **Belonging and Narrative** Simon and Schuster NEW YORK TIMES & USA TODAY Bestselling book! Elite sport typically provides obvious rewards in terms of recognition, finance and acclaim for athletic performance. Increasingly, we are becoming aware of the risks that elite athletes, their entourage, including families, sport-science support team and coaches are exposed to. Twelve original articles, seven commentaries and a corrigendum, are structured in a five chapter format. Chapter 1, comprising the Editorial, is titled "An Overview of Mental Health in Elite Sport: Changing the Play Book" to reflect the advocacy role of this article. Quantitative evidence is presented in Chapter 3 which has the sub-title the "State of Play." Chapter 4, entitled the "Field of

Finally, in Chapter 5, "Seeing the Ball Early", prospective perspectives are provided in three publications reinforced by two commentaries. There is extraordinary diversity, depth, and complexity in the encounter between theatre, performance, and human rights. Through an examination of a rich repertoire of plays and performance practices from and about countries across six continents, the contributors to this volume seek to open the way toward understanding the character and significance of this encounter. Divided into three interrelated sections, the book focuses on a range of critical and timely human rights questions as they relate to transitional justice, memory politics, citizenship, the 'War on Terror,' transnational spectatorship, and the global economic order. Authors ask what artists, audiences and readers imagine, expect, and desire from the engagement of theatre and performance with these crucial questions. Ultimately, this book aims to provide nuanced, global perspectives on the emerging and transformative aesthetics, ethics and effects of this encounter at the turn of the twenty-first century.

In its analysis of the archaeologies and histories of the northern fringe of Europe, this book provides a focus on animistic–shamanistic cosmologies and the associated human–environment relations from the Neolithic to modern times. The North has fascinated Europeans throughout history, as an enchanted world of natural and supernatural marvels: a land of light and dark, of northern lights and the midnight sun, of witches and magic and of riches ranging from amber to oil. Northern lands conflate fantasies and realities. Rich archaeological, historical, ethnographic and folkloric materials combine in this book with cutting-edge theoretical perspectives drawn from relational ontologies and epistemologies, producing a fresh approach to the prehistory and history of a region that is pivotal to understanding Europe-wide processes, such as Neolithization and modernization. This book examines the mythical and actual northern worlds, with northern relational modes of perceiving and engaging with the world on the one hand and the 'place' of the North in European culture on the other. This book is an indispensable read for scholars of archaeology, anthropology, cultural studies and folklore in

northern Europe, as well as researchers interested in how the North is intertwined with developments in the broader European and Eurasian world. It provides a deep-time understanding of globally topical issues and conflicting interests, as expressed by debates and controversies around Arctic resources, nature preservation and indigenous rights.
