"Intermediate Financial Accounting Volume 1 by G. Arnold and S. Kyle, developed in collaboration by Athabasca University and Lyryx, is intended for a first course in Intermediate Financial Accounting, and presumes that students have already completed one or two Introductory Financial Accounting courses. The textbook reflects current International Financial Reporting Standards (IFRS), such as IFRS 15 – Revenue from Contracts With Customers. This textbook provides a review of introductory accounting concepts and covers all topics essential to a first level Intermediate Accounting course: the conceptual framework and current landscape of financial reporting; statements of financial position; comprehensive income; cash flows and shareholders' equity; cash and receivables; revenue; inventory; property, plant and equipment; intangible assets; and intercorporate investments. For those requiring preparation for CPA designation, competencies as outlined by the CPA are addressed in this textbook. For a detailed competency map, please contact us at [info@lyryx.com](mailto:info@lyryx.com). It also focuses on more difficult intermediate accounting topics that match prerequisite requirements for students advancing to a second level Intermediate Financial Accounting course. Topics that are covered in Advanced Financial Accounting courses, such as consolidations and foreign exchange, are not included here."--BCcampus website.

This text helps students hit the road with a practical set of tools, and the confidence they need to use those tools effectively in making business decisions. The goal is to introduce a new "Principles of Accounting" text that better reflects a more conceptual and decision-making approach to the material. The authors have taken a new "macro-to-micro-" approach to the Principles of Accounting course by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle (although the Accounting Cycle is thoroughly covered in Chapters 3 and 4). The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world, showing them the relevance of the topics covered to their future career.

Research has shown that deep learning is enhanced by shortening the time between the introduction of new material and student interaction with this material. It is therefore important that students have an early opportunity to apply what they have learnt and gain mastery of it. The student workbook contains all the questions from the text together with answer space, following the format of the external examinations. It has been designed to enable students to experience early success with simple exercises by having these partially worked. This success gives students the confidence to progress through to more challenging examples on their own. Use of the workbook enables students to focus on concepts and procedures immediately without the necessity of learning a particular format by heart before they can begin. Over time, format becomes second nature as students develop a conceptual understanding of the purpose of each exercise. The use of workbooks also provides more time for students to interact with the subject matter itself and hence offers greater opportunity for them to master basic concepts through practice. It is suggested that students should not destroy pages when errors are made; rather than rewriting an entire question, a correction in a different coloured ink will often suffice. The student may then proceed to a new task which provides the opportunity to relearn the point which has been missed. The corrected exercises provide a focus for revision and a useful resource for independent study.

Accounting

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).
