College Accounting John Wiley & Sons Klooster and Allen's INTEGRATED ACCOUNTING

FOR WINDOWS, 7e, International Edition teaches students about computerized accounting and the operating procedures for all Windows-based programs. Klooster & Allen software was designed to emulate commercial software packages and help prepare students for the workplace. Step-wise instruction and clear examples help students understand the software without becoming overwhelmed. INTEGRATED ACCOUNTING FOR WINDOWS, 7e, International

Edition introduces software gradually through the use of opening balance files, showing students how to process ongoing accounting systems. In this way, students can concentrate on learning accounting topics while gaining software experience. Each chapter offers a sample problem, a student exercise, two software problems (with audit questions), and the use of a student-solution checker. This approach permits students to work independently and at their own pace.

Thomson South-

Western Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational

and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical, biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well

as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Libby/Libby/Short wrote this text based on their

belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-

world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

With this fourth edition, accountants will acquire a practical set of

tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro-to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates

the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.
