Conventional economic accounts, which measure Gross National Product (GNP) and related indicators of national performance, do not fully allow for the damages caused to the environment in the course of producing and consuming goods and services. Nor do they fully account for the fact that some resources are being depleted in achieving the living standards that we enjoy today. This failure is important, because policy-makers are guided by the changes in macroeconomic indicators such as GNP. Moreover such indicators are not a good guide to the sustainability of present practices of consumption and production. This book provides practical estimates of

one key area of neglect in the present national accounts - the measurement of environmental damages. The book sets out the methodology for making such estimates and then applies it to data from four countries: Germany, Italy, The Netherlands and the UK. The results show what can be achieved in the way of consistent damage estimates and what the key problems are.

The Forensic and Investigative Accounting Casebook is a collection of Problem-Based Learning cases designed to reinforce principles taught in forensic accounting/auditing courses throughout the

---

United States. Each case: (1) lays out the basic principles and parameters of analysis to be applied in uncovering and proving fraudulent activity in domestic and/or international operations; (2) provides a fact pattern and supporting documentation that allow students to not only uncover illegal activity, but also to prove such fraud in a court of law under American rules of evidence and courtroom procedure; (3) is designed for students to perform forensic investigation, alone or in teams, with the instructor serving as a facilitator; and (4) includes secondary documents that either corroborate the superficial accounting information initially provided or reveal anomalies and discrepancies pointing to who, what, when, where, how, and why.

This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation. It provides a critical overview of

the current published research and identified gaps. Through this, it aims to equip accounting academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching accounting education. The book, therefore, focuses on accounting educators as specialists in their respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work, assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education

---

research, since no such synthesis currently exists for accounting education research in South Africa.

### A Practical Guidebook with Case Studies Taylor & Francis US

For years accounting ethics has been viewed as an unimportant adjunct of academic and professional accounting. However, the economic scandals of the early twenty-first century have dramatically nullified this characterisation, with the ruination of investors in Enron, WorldCom, Waste Management, Adelphia, Tyco and scores of other business concerns raising questions about the adequacy and relevance of academic research into accounting ethics, as well as the ethical nature of professional parties.

Presenting important papers that reassess these theories, research studies and professional practices in the field of accounting ethics, this collection scrutinizes the body of knowledge that did not protect the investing public, and examines the current crisis in the creditability of financial reports.

### Management Accounting Case Book John Wiley & Sons

Case Studies for Corporate Finance: From A (Anheuser) to Z (Zypps) (In 2 Volumes) provides a distinctive collection of 51 real business cases dealing with corporate finance issues over the period of 1985 – 2014. Written by Harold

---

Bierman Jr, world-renowned author in the field of corporate finance, the book spans over different areas of finance which range from capital structures to leveraged buy-outs to restructuring. While the primary focus of the case studies is the economy of the United States, other parts of the world are also represented. Notable to this comprehensive case studies book are questions to which unique solutions are offered in Volume 2, all of which aim to provide the reader with simulated experience of real business situations involving corporate financial decision-making. Case studies covered include that of

Time Warner (1989 – 1991), The Walt Disney Company (1995), Exxon – Mobil (1998), Mitsubishi's Zero Coupon Convertible Bond (2000), and Apple (2014). Request Inspection Copy

Engaging and lively, clear and practical, this is the most applied accounting for non-specialists book whose fully integrated case study emphasises the relevance of accounting to the world of business. Sam Smart is the budding entrepreneur who forms the basis of the case study at the heart of this book. We follow Sam as he goes from starting a small business, printing sports kits for local teams, to managing a global sports

---

business. Throughout the course of the book he assesses the success of his business, finances day to day activities, makes pricing decisions, opens new branches, looks at cash flow, and facilitates planning, control, and investment. Featured at the start of every chapter to highlight to students the implications and applications of the topic they are about to study, Sam and his business provide consistency and connection. As we follow the case study, all the topics central to accounting are covered with clarity, imagination, and relevance, giving students the support they need to complete their course and exams with confidence. The wealth of additional examples and self-test exercises available alongside the case study enable students not only to develop an appreciation of how accounting information allows a manager to make key business decisions, but also to acquire the skills necessary to enable them to converse with accountants, and challenge their assumptions and methodologies.

"The benefits Carrefour achieved have been substantially in excess of predictions. The Shared Service accounting centers enabled streamlined processes, lowered costs, and introduced standard processes, a standard system, and standard data for a global company. The new infrastructure can support rapid

expansion and can add new stores with the flip of a switch. From a systems point of view, Carrefour now has a 'factory' in place to deliver high-efficiency systems, tools, processes, and training." --From Chapter 9, Implementation and Operational Imperatives for ERP "The benefits of efficient information delivery are demonstrated by the results of one of the world's largest mySAP.com implementations. Siemens achieved a twenty-five percent cost reduction through streamlined information delivery and improved access to financial information. It also enhanced its reporting capabilities from seventy percent to nearly 100 percent through increased intranet availability." --From Chapter 3, Financial and Management Reporting Research shows that high-performance businesses and governments use finance
