Learning Financial Accounting can often feel like learning a foreign language to students, in particular when terminology and procedure is piled on before core concepts are truly mastered. Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over the rote

memorization of terms, such as “debits” and “credits”. The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. The authors focus initially on conceptual underpinnings -- the reasons why we approach procedures the way we do – rather than confusing students by front-loading the material with over-complicated details. Author Chris Edmonds has also created a highly popular and widely used series of video

lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately. With a straightforward writing style and highly engaging video lectures, this dynamic author team leads students down a streamlined learning path focused on critical thinking,

clarity of concept, and applicability of material to the real world.

Accounting: Information for Business Decisions offers an integrated approach to teaching managerial and financial accounting course topics for the Introductory or Principles of Accounting course. This new text, written by an experienced author team, is designed to help students understand how to use both managerial and financial accounting information to make decisions. Class-tested for three years across the United States, its student-friendly approach has already earned it rave reviews. The text provides an introduction to business in Chapter 1 and is the only introductory accounting book to have an entire chapter

(Chapter 2) devoted to creative and critical thinking. A non-technical approach makes learning accounting accessible for majors and non-majors, focuses students on using accounting information for decision making, and conforms with AECC guidelines for teaching accounting. A full-chapter length appendix on the accounting cycle (debits/credits) allows instructors to implement this portion of the course anywhere they desire.

"Fundamental Managerial Accounting Concepts" 4e by Edmonds/Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting.

"Fundamental Managerial Accounting Concepts" 4e is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build knowledge in

stepwise fashion. The authors' goal is for students to understand the underlying principles of accounting, not just memorize content.

Are you looking for an engaging, decision-focussed approach to financial reporting that encourages students to develop their interpretative skills?

Building on the success of the first edition, this textbook takes a 'how, why, what' approach to

financial accounting, interwoven in each chapter. From chapter one, students understand how financial information is prepared and presented, why it is prepared and presented in this way, and what the resulting financial information means for users. Designed for students taking a step beyond their introductory financial accounting training, the textbook equips them with all the key tools they will require when they enter professional practice. Reflective of the latest International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), this textbook delivers concise, clear explanations of all the key issues in accounting standards that

students need to know. Content maps to professional accounting body syllabi, making this the perfect choice for accounting courses which offer exemptions. Chapters are rich with 3 types of examples to enhance understanding: - Illustrative examples of real-world situations; - Worked examples demonstrating the calculation of figures required for financial statements; - Extracts from company annual reports demonstrate how the theory relates to financial reporting in practice. More engaging, more balanced, and more applied than other offerings, this is exactly the textbook your financial reporting students need! An extensive Online Resource Centre

accompanies the textbook and includes: For students: DT Solutions to all the end-of-chapter questions in the book including walkthroughs of solutions to key questions; DT Additional graded questions including professional body questions; DT Additional interpretative case studies based on real-life companies; DT A guided tour through a company report DT Specific study skills tips for accounting students For lecturers: DT Customisable PowerPoint slides DT Solutions to all the additional online questions DT Outline solutions to the interpretative case studies DT Group discussion questions *CICA Handbook* Research & Education Assoc.
