Ticking Time Bomb. Between 1946 and 1990, on the order of 754,975 tons (over 1.5 billion pounds or 684 million kilograms) of chemical weapons were disposed in European waters. At least 21 European Nations are now potentially at risk because of the expected toxic effect on marine life and the food chain. Critical research revealed in over 400 print pages contains 111 images including 23 declassified TOP SECRET, SECRET, CONFIDENTIAL, and RESTRICTED documents, 40 photographs, and 17 maps. Principal Chapters: - Evolution of Plans for the Disposition of Captured Chemical Weapons - Accounting of All Captured Chemical Weapons - Accounting of All Sea-Disposed Chemical Weapons - Locations of the Scuttled Ships - Estimated Total Chemical Warfare Agents Disposed in European Waters - Legal Responsibilities of States - Conclusion and The Imperative for an International Strategy "Bottom Line": The environmental and public health problems facing European nations incident to the anticipated release of potentially massive amounts of slowly hydrolyzing nerve and blister agents into the marine environment are more critical and urgent than generally supposed. Increased incidents of human and marine injury in recent years have convinced many the threat of chemical poisons leaking from the deteriorating shells, canisters, and containers on the ocean floor is an imminent

and insoluble problem. The fundamental premise of this study is that when the these sea disposals occurred, dumping of toxic CW into the ocean was the preferred disposal method and was not an act of malevolence or ill will. Such dumping was not prohibited and the effect on the environment was simply not considered important at that time. It is therefore not the intent of this book to affix blame or culpability. Rather, a detailed analysis of principal findings underscores the imperative for an international strategy and a proposal for international collaboration and cooperation in addressing the potential problem is advanced.

Financial Accounting H. Lindsey Arison III

This book focuses on CSR in the public sector, in all its manifestations around the world, in order to consider its application in practice and its connections to sustainable objectives. This book is unique in that all chapters were written by members of the Social Responsibility Research Network. Their ideas have been tested and refined through the feedback given after they were presented at the 16th International Conference. The approach used in this book is based on the tradition of the Social Responsibility Research Network – a worldwide body of scholars that, over its 20-year history, has sought to broaden the discourse and to treat all research as inter-related and business-relevant. The book examines diverse aspects of how CSR and sustainability apply to, and are applied by, a variety of public bodies in a variety of ways. Thus, the authors focus on the priorities of these organisations, in order to consider the extent to which the focus has changed so much that we need to think about new approaches to our understanding of CSR and sustainability and differing effects in practice.

The international mix of authors makes this an original contribution, sharing some of the best ideas from around the world

Financial and Managerial Accounting John Wiley & Sons

The starting point for this research is the ascertainment of a major change in the spirituality paradigm of the last centuries of the European Middle Ages, which, since the 13th century, results in a new and final interpretation, focused on pauperistic, evangelical and apostolic ideals, of the religious phenomenon. This symbolic revolution, which completely changed parameters and involved both men and women, entailed an intense urbanisation and feminisation of spirituality. Within that general framework, the pages of this book attempt at investigating the penetration, evolution and changes of the new forms of female monastic and religious life in a delimited space and time: the kingdoms of the Iberian Peninsula during the period from the 13th to the 16th century, trying to establish the connection between those new spaces of female spirituality and the strategies, wishes and potentialities of the women who promoted their creation, strengthening or reform.

9781680922929. *Principles of Accounting* is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Transforming Global Information and Communication Markets Viella Libreria Editrice

Innovation in information and communication technology (ICT) fuels the growth of the global economy. How ICT markets evolve depends on politics and policy, and since the 1950s periodic overhauls of ICT policy have transformed competition and innovation. For example, in the 1980s and the 1990s a revolution in communication policy (the introduction of sweeping competition) also transformed the information market. Today, the diffusion of Internet, wireless, and broadband technology, growing modularity in the design of technologies, distributed computing infrastructures, and rapidly changing business models signal another shift. This pathbreaking examination of ICT from a political economy perspective argues that continued rapid innovation and economic growth require new approaches in global governance that will reconcile diverse interests and enable competition to flourish. The authors (two of whom were architects of international ICT policy reforms in the 1990s) discuss this crucial turning point in both theoretical and practical terms.

"As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"--

The history of the 24th Infantry regiment in Korea is a difficult one, both for the veterans of the unit & for the Army. This book tells both what happened to the 24th Infantry, & why it happened. The Army must be aware of the corrosive effects of segregation & the racial prejudices that accompanied it. The consequences of the system crippled the trust & mutual confidence so necessary among the

soldiers & leaders of combat units & weakened the bonds that held the 24th together, producing profound effects on the battlefield. Tables, maps & illustrations.
