 The issues raised by
 the role of language
 in education are
 some of the most
 important and
 contentious faced by
 education systems
 across the globe.
 Language is
 embedded in the
 concepts of
 nationhood and
 identity, and is
 therefore directly
 linked to the very
 social and political
 fabric of a country. In

a climate of increasing
 globalisation,
 development and
 mobility of
 populations, nations
 around the world are
 concerned with the
 tension between
 cultivating a sense of
 cultural and linguistic
 cohesion and making
 use of the linguistic
 diversity that exists in
 every country and
 region. This book
 examines the
 implications and
 impacts, the dilemmas
 and potential for
 language education in
 relation to education
 systems and wider
 society. Split into
 three key parts, it
 considers: *current
 issues in language
 education, including
 the role of language in
 maintaining power
 and inequalities, in
 encouraging
 participation and
 inclusion and in

challenging the status quo; *different approaches to language education around the world; *the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

The past ten years in South Africa has seen many changes in education - the creation of a single department of education;

common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the	visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the	development goals? What should the matriculation examination of the future look like? participants from government (national and provincial), <u>X-Kit Literature Series: FET Great Gatsby Oswaal Books and Learning Private Limited</u> The classic Wiley CPA Examination review Published annually, in December, this comprehensive four-volume study guide for the Certified Public Accountant's (CPA) Exam arms readers with detailed outlines

“ Twenty-twenty hindsight ” means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South

Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. “ I had a quick read and I found the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but

which few people have the guts and conviction to paint into words. ” – Louise Heystek-Emerton: CEO Wordwise/ Khulum a Awethu Study and Master Accounting Grade 12 CAPS Learner's Book AuthorHouse
