X-kit Literature Series:
FET Julius Ceaser Wiley
This book, first
published in 1988, is a

readable, concise history
of the accounting
profession in the US from
its beginnings to the late
twentieth century. It
examines the roots of the
profession, how it
developed, how its
standards have evolved,
and what social,
economic and legal
forces have shaped it.
The chapters form a

series of dramatic highlights, illustrative of the multifarious problems besetting a young profession, catapulted into prominence by the economic and social forces of the twentieth century.

 AFRICAN SUN MeDIA
 This book is intended to take
 stock of the current state of
 accounting education with a
 specific emphasis on the
 South African situation. It
 provides a critical overview of
 the current published
 research and identified gaps.
 Through this, it aims to equip
 accounting academics with
 information and tools to

motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching accounting education. The book, therefore, focuses on accounting educators as specialists in their respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work, assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education research, since no such synthesis currently exists for accounting education research in South Africa.
