accounting information systems and management information systems. This distinction is related to the types of transactions these systems process. AIS applications process financial transactions, and MIS applications process nonfinancial transactions. The section then presented a general model for accounting information systems.

James hall ch 1 - SlideShare

What is Accounting Information Systems? Accounting is an information system. It identifies, collects, processes, and communicates economic information about a firm using a wide variety of technologies. It captures and records the financial effects of the firm's transactions. It distributes transaction information to operations personnel to ...
