CONSTRUCTION ACCOUNTING & FINANCIAL MANAGEMENT, 3/e helps construction professionals and construction management students master the principles of financial management, and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.

Understanding twenty-first century global financial integration requires a two-part background. The Handbook of Key Global Financial Markets, Institutions, and Infrastructure begins its description of how we created a financially-intergrated world by first examining the history of financial globalization, from Roman practices and Ottoman finance to Chinese standards, the beginnings of corporate practices, and the advent of efforts to safeguard financial stability. It then describes the architecture itself by analyzing its parts, such as markets, institutions, and infrastructure. The contributions of sovereign funds, auditing regulation, loan markets, property rights, compensation practices, Islamic finance, and others to the global architecture are closely examined. For those seeking substantial, authoritative descriptions and summaries, this volume will replace books, journals, and other information sources with a single, easy-to-use reference work. Substantial articles by top scholars sets this volume apart from other information sources Diverse international perspectives result in new opportunities for analysis and research Rapidly developing subjects will interest readers well into the future

In Compensation and Benefit Design, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. This comprehensive book begins by introducing a valuable Human Resource Life Cycle Model for considering compensation and benefit programs. Next, Biswas thoroughly addresses the acquisition component of compensation, as well as issues related to general compensation, equity compensation, and pension accounting. He assesses the full financial impact of executive compensation programs and employee benefit plans, and discusses the unique issues associated with international HR systems and programs. This book contains a full chapter on HR key indicator reporting, and concludes with detailed coverage of trends in human resource accounting, and the deepening linkages between financial and HR planning. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, Financial Analysis for HR Managers focuses entirely on core HR issues.

HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, Financial Analysis for HR Managers focuses entirely on core HR issues. More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In *Investing in People*, Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and analyze the value of every area of HR that impacts strategic value.
