Auditing: An International Approach (formerly titled Auditing and Other Assurance Engagements) presents a comprehensive, balanced, and current introduction to the auditing field. This text bridges the gap between students' knowledge

of accounting principles and the professional practice of accounting and auditing in the working world. Emphasizing a 'cycles' approach, the book covers the financial auditor's decision-making process: 1) problem recognition and developing audit objectives, 2) evidence collection with audit procedures, and 3) making judgements about control risk and the fair presentation of financial statement assertions. Building on the strengths of the first Canadian and former U.S.

editions, the authors reflect exciting challenges inherent to current auditing practice and other assurance services. As the revised title suggests, the second edition of this best-selling text has kept pace with the growing importance of International Accounting Standards in the context of Canadian business world.

In this book, Jayne Godfrey and Keryn Chalmers explore the intricacies of the globalisation of accounting standards - arguably one of the most significant business developments of the

wider globalisation process during the past two decades. They examine the key issues and implications of this harmonization of accounting standards from the perspectives of a diverse range of worldwide stakeholders.

"Globalisation of Accounting Standards" shows that globalisation approaches differ significantly because countries seek to maintain varying degrees of sovereignty over their regulations. International differences in economic, political, legal, religious and social characteristics also affect globalisation approaches and, in turn, influence national accounting standard-setting agendas. The book explores why countries relinquish their existing national accounting standard-setting regimes to join the global movement. It also seeks to resolve questions such as: To what extent are national incentives altruistic, economic, political or social? Who are the winners and losers in the process? This authoritative book is thoroughly researched and expertly informed. Written by both academics and regulators, it tackles a critical and controversial issue in

the globalisation movement. As such, it will be of great interest to a wide-ranging audience including: international, national, private and public sector standard-setters, economic regulators, accounting academics and political economists and strategists.
