Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in

newly established regional Classics hubs in policy and practice from Australasia, in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo

North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.

The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged

5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Patriotism: do you have it? How does one express it? Is it worth it? The Singapore Trilogy—consisting of *Are You There, Singapore?*, *One Year Back Home* and *Changi*—has raised questions since the seventies about nationhood that we are still asking today. Influential in steering early English-language

theatre in Singapore away from its colonial roots, Robert Yeo conceived of characters that are believably local in speech, thought and behaviour, and provided a dramatic platform for the dialogue of politically sensitive issues. Yeo's trilogy continues to link to an exciting time of sociopolitical flux in Singapore's history, and engages by provoking us to explore the meaning of being Singaporean. This edition of these three landmark playscripts is accompanied by a new introduction from the playwright, as well as a reappraisal by Nah Dominic and Adeeb Fazah, who restaged the entire trilogy in one single condensed adaptation in March 2021. ????????(????)????
