Business reporting in a post-apocalypse global marketplace Clearly, now is the time for creating an effective business-reporting model appropriate for the markets of the twenty-first century. Rather than start from scratch after the Enron-Andersen fiasco, two leading consultants from PricewaterhouseCoopers present a plan that supplements the current model, one in which executives, accountants, analysts, investors, regulators, and other stakeholders can truly embrace the spirit of transparency. The Future of Corporate Reporting highlights the best practices for global financial reporting, explaining the concept of "performance auditing," which focuses on the real performance of the business as opposed to technical adherence to GAAS. Eccles and Masterson also discuss the pros and cons of GAAP v. IAS, present new approaches to reforming financial reporting, and outline a twenty-first-century model of accounting that will improve markets and benefit shareholders.

Corporate Financial Accounting and Reporting is a comprehensive accounting textbook directed at those using financial reports. Its aim is to help current and future managers gain a thorough understanding of companies' published reports and is unique in the fact that it covers all three years of a traditional financial accounting course. The text is divided into 3 parts: the first covers the foundations of accounting, the second part considers the components of financial statements in more depth and the third part explores how investors analyse financial statements. Recognising the increasingly.
International Corporate Reporting Wiley
Corporate Financial Reporting Analysis combines comprehensive coverage and a rigorous approach to modern financial reporting with a readable and accessible style. Merging traditional principles of corporate finance and accepted reporting practices with current models enable the reader to develop essential interpretation and analysis skills, while the emphasis on real-world practicality and methodology provides seamless coverage of both GAAP and IFRS requirements for enhanced global relevance. Two decades of classroom testing among INSEAD MBA students has honed this text to provide the clearest, most comprehensive model for financial statement interpretation and analysis; a concise, logically organized pedagogical framework includes problems, discussion questions, and real-world case studies that illustrate applications and current practices, and in-depth examination of key topics clarifies complex concepts and builds professional intuition. With insightful coverage of revenue recognition, inventory accounting, receivables, long-term assets, M&A, income taxes, and other principle topics, this book provides both education and ongoing reference for MBA students.

Financial Reporting & Analysis (FR&A) by Revsine/Collins/Johnson/Mittelstaedt emphasizes both the process of financial reporting and the analysis of financial statements. This book employs a true "user" perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter and to whom. Revsine, Collins, Johnson, and Mittelstaedt train their readers to be good financial detectives, able to read, use, and interpret the statements and-most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes.
Improving Business Reporting--a Customer Focus Routledge
The Internet bubble has collapsed and the largest bankruptcy in US history, Enron, has made the call for greater transparency in financial reporting more important than ever. Annual Reports 101 gets past the PR machine to show the meaning behind the spin. This ultra-practical guide shows you how to

thoroughly translate and read "between the lines" of the balance sheet, income statement, cash flow report, and the accompanying text. The book helps you get a true sense of the "big picture" behind the company, allowing you to move beyond the numbers themselves and the fluffy, PR-driven copy. Before you know it, you'll have the tools to spot red flags, decipher footnotes, and see past common practices that, while legal, may not give the most accurate picture.

The regulatory framework for financial reporting, auditing and governance has changed radically in recent years, as a result of problems identified from the Enron scandal and more recently from the drive to implement global standards. In a key regulatory change, a company audit committee is now expected to play a significant role in agreeing the contents of the financial statements and overseeing the activities of the auditors. Finance Directors, Audit Committee Chairs and Audit Engagement Partners are required to discuss and negotiate financial reporting and auditing issues, a significant process leading to the agreement of the published numbers and disclosures, and to the issuing of the auditor's report which accompanies them, but which is entirely unobservable by third parties. Reaching Key Financial Reporting Decisions: How Directors and Auditors Interact is a fascinating, behind-the-scenes examination of this closed process. The authors draw on the results of face to face interviews, and an extensive survey of finance directors, audit committee chairs and audit partners, and present nine company case studies highlighting the process of discussion and negotiation and the methods by which the agreed financial reporting outcome was reached. Detailed analysis of the case studies: Allows those involved in the process to benchmark their behaviours against those of others Enables a comparison between the previous and current regulatory environments to see what has changed, and sheds light on the sorts of behaviours the current regulatory framework encourages Evaluates the effectiveness of the changed regulatory regime, providing evidence relevant to current policy debates concerning the value of audit, IFRS and the relative merit of rules-based versus principles-based accounting standards in relation to professional judgement and compliance The unprecedented access and unique insights offered by this book make it invaluable for audit firm staff and partners, audit committee chairs and company directors involved in agreeing the published financial statements, as well as those who have an interest in the financial statements, but do not have access to the negotiation process.

How and why do corporations use the internet for reporting to their stakeholders? How and why has corporate reporting extended beyond financial reporting to include environmental, social, and governance (ESG) reporting and even integrated reporting. The major drivers of modern reporting have changed, to include data driven decision making, big data, and advanced analytics, as well as the use of electronic representations of data with tools such as XBRL. Here we explore the various vehicles for using the internet, including social media and blogs as well as corporate websites and the websites of regulators. And we delve into the impact of portable devices, like smartphones and tablets. Corporate reporting on the internet is changing fast because of changes in technology and stakeholder expectations. Companies are having a hard time keeping up. This book offers a roadmap to follow—a roadmap to start on now. Most importantly, the book lays out a strong case for integrated reporting and shows how reporting on the internet is ideally suited to the creation of integrated reports. This book is of interest to executives in charge of the reporting function for their companies, students of accounting and management, and to serious investors and others with a strong interest in corporate reporting and the direction in which it is headed.
