This is the fullest account ever published of Latin suffixes in English. It explores the rich variety of English words formed by the addition of one or more Latin suffixes, such as ial, -able, -ability, -ible, and -id. It traces the histories of over 3,000 words and reveals the range of derivational patterns in Indo-European, Latin, and English. It makes an important contribution to the history of English and Latin morphology and etymology, as well as to the history of suffixal derivation in Indo-European.

Expert Indexing in Oracle Database 11g is about the one database structure at the heart of almost all performance concerns: the index. Database system performance is one of the top concerns in information technology today. Administrators struggle to keep up with the explosion of access and activity driven by the proliferation of computing into everything from phones to tablets to PCs in our increasingly connected world. At the heart of any good-performing database lies a sound indexing strategy that makes appropriate use of indexing, and especially of the vendor-specific indexing features on offer. Few databases fully exploit the wealth of data access mechanisms provided by Oracle. Expert Indexing in Oracle Database 11g helps by bringing together information indexing and how to use it into one, convenient and blissfully short volume that you can read quickly and have at your fingertips for reference. Learn the different types of indices available and when each is best applied. Recognize when queries aren ’ t using indices as you intend. Manage your indexing for maximum performance. Let Expert Indexing in Oracle Database 11g be your guide to deep mastery of the most fundamental performance optimization structure in Oracle Database. Explains how indices work, how they help, and how they hinder Demystifies the various index choices Describes the database administration chores associated with indices

This publication is the outcome of work of the UNECE Group of Experts on Euro-Asian Transport Links (EATL) in phase III of the project (2013-2017). The report was drafted by a consultant from the Scientific and Research Institute of Motor Transport (NIIAT) in Moscow and is focused both at coordination and facilitation of financing of infrastructural projects, as well as facilitating and removing physical and administrative bottlenecks at border crossings in overland transport between Europe and Asia. The report is a particularly useful tool for transport policy-makers from Landlocked Developing Countries (LLDCs) and transit countries in the Euro-Asian region and beyond, in that it, inter alia: i) Identifies and describes main commodity groups for the transport of which inland modes of transport can compete with maritime and aviation modes (incl. non-containerized, containerized and high-value containerized cargo); ii) Provides analysis showing the economic advantage (in terms of time and costs) of inland routes compared to air or maritime routes; and iii) Identifies the current strengths and weaknesses and lists several recommendations to make inland routes more competitive vis- à -vis the other modes. The EATL project's principal value to the market is that it paved the way for the operation of container "block trains". The development of the block trains, the so called "highways of railways" made the Euro-Asian corridors operational, serving as a regular mechanism controlled by the market that evaluates the service levels and requests for greater facilitation, cooperation and investment.

Principles of Marketing OECD Publishing
From archaeological jargon to interpretation, *Archaeology: The Basics* provides an invaluable overview of a fascinating subject and probes the depths of this increasingly popular discipline, presenting critical approaches to the understanding of our past. Lively and engaging, *Archaeology: The Basics* fires the archaeological imagination whilst tackling such questions as: What are the basic concepts of archaeology? How and what do we know about people and objects from the past? What makes a good explanation in archaeology? Why dig here? This ultimate guide for all new and would-be archaeologists, whether they are students or interested amateurs, will prove an invaluable introduction to this wonderfully infectious discipline.

Innovation Management and New Product Development, 3/e The main aim of this book, however,
is to bring together the areas of innovation management and new product development and to keep a
strong emphasis on innovation as a management process. Written in an accessible style, this third
edition brings a change in structure to clearly set out three key areas for the student: Innovation
management, managing technology and knowledge and new product development. Brand
Management: A Theoretical and Practical Approach, 1/e Brand Management: A theoretical and
practical approach gives insight into this phenomenon, moving from the history of the brand to how
to develop, manage and protect brands. The book takes a decision-making approach to the subject,
structured around the decisions a brand or product manager would face when considering their own
brand strategy, covering topics such as design, judicial protection, adverse publicity and financial-
brand valuation.
