Most people know that there are  
70 million Baby Boomers in  
America today....but what is less  
known is that there are

approximately 100 million people  
in America between the ages of  
16 and 30. This generation has  
just entered, or will soon be  
entering the work force. And  
they have no idea how to invest,  
save, or handle their money.  
Young people today come out of  
school having had little or no  
formal education on the basics of  
money management. Many have  
large debts from student loans  
looming over their heads. And  
many feel confused and  
powerless when their pricey  
educations don't translate into  
high paying jobs. They feel that  
their \$30,000-\$40,000 salary is  
too meager to bother with

investing, and they constantly  
fear that there will be "too much  
month left at the end of their  
money." Douglas R. Andrew has  
shown the parents of this  
generation a different pathway to  
financial freedom. Now Doug  
and his sons, Emron and Aaron -  
both of whom are in their  
mid-20s - show the under-30  
crowd how they can break from  
traditional 401k investment plans  
and instead can find a better way  
by investing in real estate,  
budgeting effectively, avoiding  
unnecessary taxes and using life  
insurance to create tax-free  
income. With the principles  
outlined in *Millionaire by Thirty*,

This book challenges the widely-held view that Marxism is unable to deal adequately with environmental problems. Jonathan Hughes considers the nature of environmental problems, and the evaluative perspectives that may be

brought to bear on them. He examines Marx's critique of Malthus, his method, and his materialism, interpreting the latter as a recognition of human dependence on nature. Central to the book's argument is an interpretation of the development of the productive forces which takes account of the differing ecological impacts of different productive technologies while remaining consistent with the normative and explanatory roles that this concept plays within Marx's theory. Turning finally to Marx's vision of a society founded on the communist principle to each according to his needs, the author concludes that the underlying notion of human need is one whose satisfaction

presupposes only a modest and ecologically feasible expansion of productive output.

The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-

---

budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British,

American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.
