Ross Morrison McGill, aka @TeacherToolkit believes that becoming a teacher is one of the best decisions you will ever make, but after more than two decades in the classroom, he knows that it is not an easy journey! Packed with countless anecdotes, from disastrous observations to marking in the broom cupboard, TE@CHER TOOLKIT is a compendium of teaching strategies and advice, which aims to motivate, comfort, amuse and above all reduce the workload of a new teacher. The book includes humorous illustrations, photocopiable templates, a new-look 5 minute plan and QR codes to useful videos. This limited edition hardback version will be an invaluable addition to your school CPD library or a long-lasting bible to keep with you throughout your teaching career. As anyone who has followed him on Twitter knows, Ross is not afraid to share the highs and lows of his own successes and failures. He strives to share great teaching practice, to save you time and to ensure you are the best teacher you can be, whatever the new policy or framework. His eagerly-awaited new book continues in this vein and is a must-read for all new teachers. Vitruvian teaching will help you survive your first five years: Year 1: Be resilient (surviving your NQT year) Year 2: Be intelligent (refining your teaching) Year 3: Be innovative (take risks) Year 4: Be collaborative (share and work with others now your classroom practice is secure) Year 5: Be aspirational (moving towards middle leadership) Start working towards Vitruvian today. [Digital Passport](#) BenBella Books, Inc. Through vibrant artwork and Buddhist quotes, this deck offers ancient wisdom to help bring peace and balance to your busy life. A History of the Roman People Manning Publications Company
More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Batteries in a Portable World Maupin House Publishing, Inc.
Honeyball and Bowers' Textbook on Employment Law is an approach to employment law with strong critical analysis whilst placing it in its wider contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essaypreparation and research. Setting employment law in context, this book considers both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

[Hello World!](#) John Wiley & Sons
This book provides a practical, multidisciplinary approach to support a broad range of health professionals, social workers, public health workers and others tasked with providing health and care to young adults. The continuum of life begins with the health and wellness of parents prior to conception, followed by embryonic and fetal development, and continues throughout life. Each person's life stages prepare them for the next and determine their health outcome and wellbeing over time. The text highlights the importance of promoting health throughout the lifespan, the influence of intergenerational health, and the concept of the Developmental Origins of Health and Disease in epigenetic processes and embryology. Authors underscore the importance of advancing health equity and lift up some of the ethical considerations in this work. The authors explore specific interventions in four major categories: Lifestyle, Infections, Nutrition, and Contraception / Pregnancy Planning (LINC). Preconception care is defined by the World Health Organization as the provision of biomedical, behavioural and social health interventions to women and couples before conception. Preconception care includes evidence-based interventions to improve health status, to reduce behaviours, individual and environmental factors that contribute to poor health outcomes. This book offers readers evidence-based guidance regarding fertility awareness and sperm health, genetic counselling and lifestyle assessments, as well as mental wellbeing, alcohol, tobacco and pharmacotherapy, and specialist care for those with chronic conditions, including a review of medications. It also covers relevant infections, including HIV and the Zika virus, as well as different types of

environmental and occupational exposure. The book employs a framework focusing on health promotion, the social determinants of health, and the science behind preconception care. Strategies for improving preconception and interconception health, including examples from around the globe, are described in detail.

3D Printing For Dummies Routledge

In Evangelist Marketing, Alex Goldfayn argues that technology companies succeed in spite of their marketing, not because of it. He says that if consumer tech makers ceased all marketing activity today, they would not see a significant decline in sales. In this book, Alex presents why the current state of overly-technical, features-oriented tech marketing, branding, communications and public relations is costing the industry billions of dollars—easy money that's voluntarily being left on the table. Then he lays out a step-by-step system for creating intensely loyal brand evangelists based on deep consumer insights and simple, emotional language. Evangelist Marketing is written for consumer tech companies big and small—from PC manufacturers to Web-based services. It's also sure to improve the work of their marketing and public relations agencies.
