This IBM® Redbooks® publication addresses performance tuning topics to help leverage the virtualization strengths of the POWER® platform to solve clients' system resource utilization challenges, and maximize system throughput and capacity. We examine the performance monitoring tools, utilities, documentation, and other resources available to help technical teams provide optimized business solutions and support for applications running on IBM POWER systems' virtualized environments. The book offers application performance examples deployed on IBM Power Systems™ utilizing performance monitoring tools to leverage the comprehensive set of POWER virtualization features: Logical Partitions (LPARs), micro-partitioning, active memory sharing, workload partitions, and more. We provide a well-defined and documented performance tuning model in a POWER system virtualized environment to help you plan a foundation for scaling, capacity, and optimization. This book targets technical professionals (technical consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing solutions and support on IBM POWER systems, including performance tuning.

Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages,

engaged or planned couples and married couples.

For courses in Intermediate Macroeconomics Help students understand macroeconomics in theory as well as practice Macroeconomics: Policy and Practice, Second Edition draws on the rich tapestry of recent economic events to help students understand the policy issues debated by the media and the public at large during these trying times. Building on his expertise in macroeconomic policy making at the Federal Reserve, author Frederic S. Mishkin provides detailed, step-by-step explanations of all models and highlights the techniques used by policy makers in practice. The Second Edition incorporates a wealth of new and updated content, as well as new tools and resources in MyEconLab that bring course material to life. This text provides a better teaching and learning experience—for you and your students. It will help you to:

- Personalize learning with MyEconLab: This online homework, tutorial, and assessment program engages students in learning and provides instructors tools to keep students on track.
- Enable students to connect theory to practice: An aggregate demand and supply model helps students understand theory, while numerous examples help them understand the applications of theory.
- Foster interest via engaging features and updated content: Updates that reflect the latest happenings in the world of economics and student-friendly in-text tools capture student interest.
- Teach your course your way: A flexible structure allows instructors to focus on the particular areas of macroeconomics that match their course goals.

Note: If you are purchasing the standalone text or electronic version, MyEconLab does not come automatically packaged with the text. To purchase MyEconLab please visit www.myeconlab.com or you can purchase a package of the physical text + MyEconLab by searching for 0133578240 / 9780133578249. MyEconLab is not a self-paced technology and should only be purchased when required by an instructor.
