This contributed volume focuses on diasporans, their characteristics, networks, resources and activities in relation to international business and entrepreneurship. It presents an overview of diaspora concepts from an economic perspective, and analyzes the global-economic and societal effects and mechanisms, revealing both positive and negative aspects of diaspora activities. Providing insights into the socio-cultural influences, it discusses diaspora entrepreneurship and international business, the respective organisational models, investments and business types. Lastly it offers an assessment of managing diaspora resources and policymaking. This book was created by an interdisciplinary team of editors, co-authors and reviewers including historians, sociologists, psychologists, linguists and ethnologists, as well as experts in public policy, international business, marketing and entrepreneurship. This unique team (many of the authors are themselves diasporans with an extensive understanding of their topic) provides the first global academic platform on the subject, combining the latest empirical evidence from developing, emerging, transitional and developed countries with various combinations of diaspora flows that to date have received little attention.

This book is dedicated to applied gamification in the areas of education and business, while also covering pitfalls to avoid and guidelines needed to successfully implement for a project. Using different theoretical backgrounds from various areas including behavioral economics, game theory, and complex adaptive systems, the contributors aim to help readers avoid

common problems and difficulties that they could face with poor implementation. The book's contributors are scholars and academics from the many areas where the key theory of gamification typically comes from. Ultimately, the book's goal is to help bring together the theories from these different disciplines to the field of practice in education and business. The book is divided into four parts: Theory, Education, Business, and Use Cases. Part I provides a foundation on the theory of gamification and offers insight into some of the outstanding questions that have yet to be addressed. In Part II, the application and value that gamification can bring within the education sector is examined. The book then changes focus in Part III to spotlight the use of gamification within business environments. The topics also cover educational aspects like improved learning outcomes, motivation, and learning retention at the workplace. Finally Part IV concentrates on the applications and use of gamification through a series of case studies and key elements that are used in real situations to drive real results.

Review of Social Determinants and the Health Divide in the WHO European Region Acer Press

After his 1728 Virginia-North Carolina boundary expedition, Virginia planter and politician William Byrd II composed two very different accounts of his adventures. *The Secret History of the Line* was written for private circulation, offering tales of scandalous behavior and political misconduct, peppered with rakish humor and personal satire. *The History of the Dividing Line*, continually revised by Byrd for decades after the expedition, was intended for the London literary market, though not published in his lifetime. Collating all extant manuscripts, Kevin Joel Berland's landmark scholarly edition of these two histories provides wide-ranging historical and cultural contexts for both, helping to recreate the social and intellectual ethos of Byrd and his time. Byrd enriched his narratives with material appropriated from earlier authors, many of whose works were in his library--the most extensive in the American colonies. Berland identifies for the first time many of Byrd's sources and raises the question: how reliable are histories that build silently upon antecedent texts and present borrowed material as firsthand testimony? In his analysis, Berland demonstrates the need for a new category to assess early modern history writing: the hybrid, accretional narrative.

Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries.

This is the first edition since its original publication of Daniel Heinsius' Latin tragedy *Auriacus, sive Libertas saucia* (Orange, or Liberty Wounded, 1602), with an introduction, a parallel English translation, and a commentary. Centering on the assassination of William of Orange, one of the leaders of the Dutch Revolt against King Philip II of Spain, *Auriacus* was Heinsius' history drama, with which he aimed to raise Dutch drama to the level of classical drama. Highly influential, the tragedy contributed to the construction of a national identity in the Low Countries and launched Heinsius' long career as an internationally celebrated poet and professor at Leiden University.

This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the diverse effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of the positive and negative impacts in regard to social and environmental sustainability. This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

The Spiritual Significance of Flowers Berkley

Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas, and their far reaching effects, continue to challenge and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on: • active learning • hands-on enquiry • critical thinking • creativity • argumentation • interdisciplinarity. In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science.

For reasons of effectiveness, efficiency and equity, Australian law reform should be planned carefully. Academics can and should take the lead in this process. This book collects over 50 discrete law reform recommendations, encapsulated in short, digestible essays written by leading Australian scholars. It emerges from a major conference held at The Australian National University in 2016, which featured intensive discussion among participants from government, practice and the academy. The book is intended to serve as a national focal point for Australian legal innovation. It is divided into six main parts: commercial and corporate law, criminal law and evidence, environmental law, private law, public law, and legal practice and legal education. In addition, Indigenous perspectives on law reform are embedded throughout each part. This collective work—the first of its kind—will be of value to policy makers, media, law reform agencies, academics, practitioners and the judiciary. It provides a bird's eye view of the current state and the future of law reform in Australia.

A History of Literary Criticism BRILL

From the 23rd to 26th of November 2009 in La Palma island, in the Canaries, the Comparative Education Society in Europe (CESE) organized an international symposium entitled *PISA under Examination: Changing Knowledge, Changing Tests, and Changing Schools*. During four days seventeen leading scholars of Europe and America presented their

contributions to debate the different problematiques of the remarkable phenomenon represented by the OECD Programme for International Student Assessment or PISA. PISA is not merely an educational event. It is also a media circus which involves the public rehearsal for reasons for failure or success; and even, in some cases, public and political and academic explanations about why 'failure' was not really that, and why 'success' was not really that either. At the centre of all these indications, we find the growing influence of international agencies on education and schooling which is decisively contributing to a marketisation of the field of education, in the context of an increasingly multilevel and fragmented arena for educational governance based on the formulation, the regulation and the transnational coordination and convergence of policies, buttressed at the same time by the diffusion of persuasive discursive practice. Organized in four sections entitled The Comparative Challenges of the OCDE PISA Programme, PISA and School Knowledge, The Assessment of PISA, School Effectiveness and the Socio-cultural Dimension, PISA and the Immigrant Student Question, and Extreme Visions of PISA: Germany and Finland, the contributions of this book offers a comprehensive approach of all these challenging and significant issues written from different and distinct research and academic traditions.
