13th Central Hardwood Forest Conference "O'Reilly Media, Inc."

A comprehensive and indispensable reference for identifying and appreciating native flora From its summits to its shores, South Carolina brims with life and unparalleled beauty thanks to its abundant array of native and naturalized flora, all carefully documented in this revised and expanded edition of A Guide to the Wildflowers of South Carolina. Dramatic advances in plant taxonomy and ecology have occurred since the guide's publication 20 years ago; new species have been discovered while others struggle to survive in the face of vanishing habitats and climate change. The authors, all experienced botanists, offer essays on carnivorous plants, native orchids, Carolina bays, the roles and effects of fire and agriculture on the landscape, and detailed descriptions of the plant communities throughout the state's major natural regions.

Covering both higher education and school education, this book contributes to the field of assessment by providing a systematic account of student self-assessment based on a consistent conceptualisation. Yan advocates viewing self-assessment as an active and reflective process and using it as a learning strategy rather than an assessment method. He builds on a newly-developed self-assessment model adopting a process perspective and synthesises a series of interrelated empirical investigations into the whole "chain"

of student self-assessment research. The research encompassed in the volume spans from self-assessment practices and measurement, through predictors of self-assessment, its interweaved relationship with self-regulated learning and feedback literacy, impact on student learning outcomes, to designing sustainable self-assessment interventions. The empirical evidence is from a wide range of current scholarship to ensure that the principles and implications conveyed are applicable internationally. Policymakers, students and scholars in educational assessment, educational psychology, and teaching and instruction will find the theoretical explorations and empirical investigations contained within useful, to show how student self-assessment could be better conceptualised, researched, and practised.

As the HVACR industry continues to move forward and innovate, the refrigerants that were once so commonplace are now being phased out. Replacing them are more energy efficient, environmentally friendlier refrigerants, known as Low GWP refrigerants. Many of these new refrigerants are classified by ASHRAE as A2L, or slightly flammable. The industry is also seeing expanded use of some hydrocarbon (A3) refrigerants, such as propane and isobutane. Students and technicians will require additional training for the safe handling and transportation of these refrigerants. The Low GWP refrigerant program manual covers: Refrigerant safety Introduction to Low GWP refrigerants Refrigerant properties and characteristics The refrigeration cycle Working with refrigerant blends Proper installation and service guidelines Flammable refrigerant considerations Explanation of the associated codes and standards for A2L refrigerants
