The first part of the article reviews the literature (mainly British) on the relationships between academic

performance in higher education and motivation and study habits. The distinction between goal-orientated and intrinsic motivation is used to clarify the

meaning of previous studies. Among the investigations of study habits, the dimension of syllabus-boundness/syllabus-freedom helps to relate psychiatric work on study difficulties to research using self-report inventories. *Study of the relationship between study habits and ...* The first part of the article reviews the literature (mainly British) on the relationships between academic performance in higher education and motivation and study habits.

A Study of Study Habits and Academic Achievement among ...
Achievement Motivation is generally regarded as the drive to achieve targets and the process to maintain the drive. Motivation provides an important foundation to complete cognitive behavior, such as planning, organization, decision-making, learning, and assessments (Pintrich & Schunk, 1996).
