In the past decade, a number of different research communities within the computational sciences have studied learning in networks, starting from a number of different points of view. There has been substantial progress in these different communities and surprising convergence has developed between the formalisms. The awareness of this convergence and the growing interest of researchers in understanding the essential unity of the subject underlies the current volume. Two research communities which have used graphical or network formalisms to particular advantage are the belief network community and the neural network community. Belief networks arose within computer science and statistics and were developed with an emphasis on prior knowledge and exact probabilistic calculations. Neural networks arose within electrical engineering, physics and neuroscience and have emphasised pattern recognition and systems modelling problems. This volume draws together researchers from these two communities and presents both kinds of networks as instances of a general unified graphical formalism. The book focuses on probabilistic methods for learning and inference in graphical models, algorithm analysis and design, theory and applications. Exact methods, sampling methods and variational methods are discussed in detail. Audience: A wide cross-section of computationally oriented researchers, including computer scientists, statisticians, electrical engineers, physicists and neuroscientists.

Traditional retail is becoming increasingly volatile and challenged as a business model. Brick-and-mortar has shifted to online, while online is shifting into pop-up storefronts. Virtual stores in subway platforms and airports are offering new levels of convenience for harried commuters. High Street and Main Street are becoming the stuff of nostalgia. The Big Box is losing ground to new models that attract consumers through their most-trusted assistant—the smartphone. What's next? What's the future for you—a retailer—who is witnessing a tsunami of change

and not knowing if this means grasping ahold of new opportunity or being swept away? The Retail Revival answers these questions by looking into the not-so-distant retail past and by looking forward into a future that will continue to redefine retail and its enormous effect on society and our economies. Massive demographic and economic shifts, as well as historic levels of technological and media disruption, are turning this once predictable industry—where “average” was king—into a sea of turbulent change, leaving consumer behavior permanently altered. Doug Stephens, internationally renowned consumer futurist, examines the key seismic shifts in the market that have even companies like Walmart and Procter & Gamble scrambling to cope, and explores the current and future trends that will completely change the way we shop. The Retail Revival provides no-nonsense clarity on the realities of a completely new retail marketplace—realities that are driving many industry executives to despair. But the future need not be dark. Stephens offers hope and guidance for any businesses eager to capitalize on these historic shifts and thrive. Entertaining and thought-provoking, The Retail Revival makes sense of a brave new era of consumer behavior in which everything we thought we knew about retail is being completely reimaged. Praise for The Retail Revival “It doesn't matter what type of retail you do—if you sell something, somewhere, you need to read Doug Stephens' The Retail Revival. Packed with powerful insights on the changing retail environment and what good retailers should be thinking about now, The Retail Revival is easy to read, well-organized and provides essential food for thought.” —Gregg Saretsky, President and CEO, WestJet “This book captures in sharp detail the deep and unprecedented changes driving new consumer behaviors and values. More importantly, it offers clear guidance to brands and retailers seeking to adapt and evolve to meet entirely new market imperatives for success.” —John Gerzema, Author of Spend Shift and The Athena Doctrine “The Retail Revival is a critical read for all marketing professionals who are trying to figure out what's next in retail... Doug Stephens does a great job of explaining why retail has evolved the way it has, and the book serves as an important, trusted guide to where it's headed next.” —Joe Lampertius SVP, Shopper Marketing, Momentum Worldwide and Owner, La Spezia Flavor Market “Doug Stephens has proven his right to the moniker ‘Retail Prophet.’ With careful analysis and ample examples, the author makes a compelling case for retailers to adapt, change and consequently revive their connection with consumers. Stephens presents actionable recommendations with optimism and enthusiasm—just the spoonful of sugar we need to face the necessary changes ahead.” —Kit Yarrow, Ph.D., Consumer Psychologist; Professor, Golden Gate University; Co-Author, Gen BuY: How Tweens, Teens and Twenty-Somethings are Revolutionizing Retail “Doug Stephens doesn't just tell you why retail is in the doldrums, he tells you why retail is a major signpost for the larger troubles of our culture and provides a compelling, inspiring vision for a future of retail—and business, and society.” —Eric Garland, author of Future Inc.: How Businesses Can Anticipate and Profit from What's Next

An officer in the original Navy SEALs, an Olympian, a national champion, the first swim coach at the University of Texas, and the founder of the nation's biggest summer camp, Tex Robertson was a rare individual who pushed the bounds of what one man can accomplish in a lifetime. From his creation of the now-ubiquitous flip turn technique as a swimmer at Michigan to his numerous inventions at Camp Longhorn (including the Frisbee), the effects are still felt today from the life of a man who grew up in frontier West Texas and became, by sheer force of will, an influential figure in state history. To have a major impact in just one area of expertise would be impressive in itself, but Tex Robertson impacted swimming, the U.S. military, wildlife conservation, coaching, youth camping, and - through his connections with multiple Presidents - politics. Featuring a foreword by former U.S. Senator Kay Bailey Hutchison, **TEX: The Father of Texas Swimming** is five books in one, each detailing an aspect of a unique and fascinating life: *From Mudhole to Michigan - The Story of Tex the Swimmer*, *Longhorns and Frogmen - The Story of Tex the Coach*, *Attawaytogo - The Founding of Camp Longhorn*, *Political Bulldog - Tex and Politics*, *It Only Takes a Spark... - The Legacy of Tex Robertson*

This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Routledge Handbook of Sustainable Design considers the design, not only of artifacts, but of structures, systems, and interactions in the context of sustaining our shared planet. This revised edition introduces new and updated chapters, as well as a new section on pedagogy for sustainable design. The Ashtavakra Gita, or the Ashtavakra Samhita as it is sometimes called, is a very ancient Sanskrit text. Nothing seems to be known about the author, though tradition ascribes it to the sage Ashtavakra; hence the name. There is little doubt though that it is very old, probably dating back to the days of the classic Vedanta period. The Sanskrit style and the doctrine expressed would seem to warrant this assessment. The work was known, appreciated and quoted by Ramakrishna and his disciple Vivekananda, as well as by Ramana Maharshi, while Radhakrishnan always refers to it with great respect. Apart from that the work speaks for itself. It presents the traditional teachings of Advaita Vedanta with a clarity and power very rarely matched. The Reverend John Henry Richards, MA, BD, was an Anglican priest born in 1934 who was ordained a deacon in Llandaff in 1977 and a priest there in 1978. He served in Maesteg, Cardiff, Penmark, and Stackpile Elidor until his retirement in 1999, and died in 2017. He is known for his English translations of the Ashtavakra Gita, the Dhammapada, and the Vivekachudamani, which he put in the public domain and distributed on the Internet in 1994. The text used here is the one revised in 1996.
