The Author has been creating Visual Basic Programs for Options Trading while living in Spain starting in 1990. Your Author decided to write this book based on his writing new Options Trading programs using the most up to date Visual Pasic downloaded from the Visual Basic Website & Java. The downloads from Microsoft & Java are free of charge. The first sections explain the steps I had to take to use Visual Basic Express & Java Programming & the Java Platform to supplement the information in the Help section. I will give three examples of possible uses of Visual Basic. One Example is a program that allows you to use my latest Options Trading software for trading OEX Weekly Options which were first introduced in the CBOE on 28 October 2005. I adapted my OEX options trading strategies to use these weekly options. I use the realtime quotes from DTN.IQ & the free delayed quotes from CBOE for the programs. The second section explains how to use Visual Basic Express to prepare a PDF book document ready to submit to BookSurge/CreateSpace, subsidiary of Amazon.com & to Google Books Partner Program. The example can be. easily adapted to fit any POD publisher's format. The third example is totally different: how to win the TransPac Yacht Race from Los Angeles to Honolulu.

Do you spend too much time doing repetitive production tasks such as placing and replacing images, resizing them, dragging them from one document to another, and preparing images for printing instead of being creative? Do you use Adobe Acrobat and have a strong working knowledge of JavaScript? Then you're in luck. Since Adobe Creative Suite 2 was created with built-in support for scripting, virtually every repetitive or time-consuming task that creative professionals have to do in Acrobat can be streamlined or automated with the help of a script. This book describes how to use JavaScript to manipulate and extend Adobe Acrobat, and provides reference information for the JavaScript objects, properties, and functions defined by Adobe's applications. Now available in print for the first time, this book doesn't teach you how to write code in JavaScript, but if you're familiar with the scripting language, and want to start writing scripts for Acrobat, you'll appreciate having the most definitive, up-to-date referenceavailable.
[Programming the Web with Visual Basic .NET](#) American Bar Association
¿Programming the Web with Visual Basic .NET¿ is a comprehensive guide to building Web applications and services using Visual Basic .NET. It is written especially for experienced Visual Basic programmers who use Visual Studio .NET for their development work, even those who have never written a Web application before. Because the .NET Framework simply blows away the archaic tools previously available to Web programmers, the authors predict that many Visual Basic programmers who successfully avoided Web programming in the past will now bring their expertise to the Web. However, even experienced Web programmers will greatly benefit from the authors' thorough coverage of the ASP.NET namespaces and their clear coverage of the ADO.NET classes most important to Web applications that use relational databases for data storage. All developers will benefit from the authors' extensive practical advice (based on their unique professional backgrounds) about how to produce create high quality code and how to create professional, usable Web sites. After reading ¿Programming the Web with Visual Basic .NET¿, developers will understand how to build and deploy top quality, professionally designed, highly usable Web applications using Visual Basic .NET. Author Information Constance Petersen co-authored the best-selling Visual Basic 4 How-To and has been recognized with the Microsoft Most Valuable Professional (MVP) award for her contributions to the VB development community. The creative force within SoftMedia Artisans, she has written extensively on Web design and usability. Lynn Torkelson, a grizzled veteran of assembly language and C programming, has extensive experience using Visual Basic to develop client-server business applications. Lynn also did tours of duty as a software development manager and as a manager of software quality. Zac Torkelson began investigating the joys of programming at the age of ten and gradually intensified his interest. He soon learned VB5, then VB6, and C++. Zac then began using the Windows API extensively in his programs. Upon the arrival of the first .NET Beta, Zac switched to Visual Basic .NET and C#. These days he particularly likes to program multiplayer online games.
