A New Law-dictionary: The Stationery Office

This book synthesizes and integrates 40 years of research on the semantics of questions, and its interface with pragmatics and syntax, conducted within the formal semantics tradition. A wide range of topics are covered, including weak-strong exhaustiveness, maximality, functional answers, single-multiple-trapped list answers, embedding predicates, quantificational variability, concealed questions, weak islands, polar and alternative questions, negative polarity, and non-canonical questions. The literature on this rich set of topics, theoretically diverse and scattered across multiple venues, is often hard to assimilate. Veneeta Dayal, drawing on her own research, brings them together for the first time in a coherent, concise, and well-structured whole. Each chapter begins with a non-technical introduction to the issues discussed; semantically sophisticated accounts are then presented incrementally, with the major points summarized at the end of each section. Written in an accessible style, this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing. It will be a unique resource for the novice and expert alike, and seeks to appeal to a variety of readers

without compromising depth and breadth of coverage.

Law Society Journal The Stationery Office

From the first incident of petty theft to modern media piracy, crime and punishment have been a part of every society. However, the structure and values of a particular society shape both the incidences of crime and the punishment of criminals. When the United States became an independent nation, politicians and civilians began the process of deciding which systems of punishment were appropriate for dealing with crimea process that continues to this day. Crime and Punishment in America examines the development of crime and punishment in the United Statesfrom the criminal justice practices of American Indians and the influence of colonists to the mistreatment of slaves, as well as such current criminal issues as the response to international terrorism.

This new edition introduces the reader to the philosophy of early Christianity in the second to fourth centuries AD, and contextualizes the philosophical contributions of early Christians in the framework of the ancient philosophical debates. It examines the first attempts of Christian thinkers to engage with issues such as questions of cosmogony and first principles, freedom of choice, concept formation, and the body – soul relation, as well as later questions like the status of the divine persons of the Trinity. It also aims to show that the philosophy of early Christianity is part of ancient philosophy as a distinct school of thought, being in constant dialogue with the ancient philosophical schools, such as Platonism, Aristotelianism, Stoicism, and even Epicureanism and Scepticism. This book examines in detail the philosophical views of Christian thinkers such as Justin Martyr, Clement of Alexandria, Irenaeus, Tertullian, Origen, Basil, and Gregory of Nyssa, and sheds light in the distinct ways they conceptualized traditional philosophical issues and made some intriguing contributions. The book's core chapters survey the central philosophical concerns of the early Christian thinkers and examines their contributions. These range across natural philosophy, metaphysics, logic and epistemology, psychology, and ethics, and include such questions as how the world came into being, how God relates to the world, the status of matter, how we can gain knowledge, in what sense humans have freedom of choice, what the nature of soul is and how it relates to the body, and how we can attain happiness and salvation. This revised edition takes into account the recent developments in the area of later ancient philosophy, especially in the philosophy of Early Christianity, and integrates them in the relevant chapters, some of which are now heavily expanded. The Philosophy of Early Christianity remains an crucial introduction to the subject for undergraduate and postgraduate students of ancient philosophy and early Christianity, across the disciplines of classics, history, and theology.

Income Tax Law and Practice Sultan Chand & Sons

This new English translation of Solov'ëv's principal ethical treatise, written in his later years, presents Solov'ëv's mature views on a host of topics ranging from a critique of individualistic ethical systems to the death penalty, the meaning of war, animal rights, and environmentalism. Written for the educated public rather than for a narrow circle of specialists, Solov'ëv's work largely avoids technical vocabulary while illustrating his points with references to classical literature from the ancient Greeks to Goethe. Although written from a deeply held Christian viewpoint, Solov'ëv emphasizes the turn from his earlier position, now allegedly developing the independence of moral philosophy from metaphysics and revealed religion. Solov'ëv sees the formal universality of the idea of the moral good in all human beings, albeit that this idea is bereft of material content. This first new English-language translation in a century makes a unique contribution to the study of Solov'ëv's thought. It uses the text of the second edition published in 1899 as its main text, but provides the variations and additions from the earlier versions of each chapter in running notes. Other unique features of this translation are that the pagination of the widely available 1914 edition is provided in the text, and the sources of Solov'ëv's numerous Biblical quotations and references as well as literary and historical allusions.

The book has been written with the twin goals of educating the students about the nuances of Income Tax so that they can compute income from various heads and make the students aware of the compliance required for smooth functioning of the Income Tax scheme. The book also discusses the practical aspects that an auditor should focus on while computing tax liability and where tax-payers need to be more careful. Dedicated chapters on analysis of income, giving itemized compliance requirements by the tax-payers, as well as complete steps required for filing returns, are presented in this book in a very effective manner. New amendments of the Finance Act 2021 have been incorporated at appropriate places in this book. This book is a comprehensive text on the subject of Income Tax Law and Practice to meet the vulnerable need of B.Com., BBA, M.Com., MBA and similar professional courses in Commerce and Management are offered by various Universities across the country. The book aims to provide an understanding of Income Tax: Law and Practices and prepare students for their future assignments in the direct tax field.
