Reflecting the latest developments in the field, The Practice of Health Program Evaluation, Second Edition provides readers with effective methods for evaluating health programs and offers expert guidance for collaborating with stakeholders involved in the process. Author David Grembowski explores evaluation as a three-act play: Act I shows evaluators how to work with decision makers and other groups to identify the questions they want answered; Act II covers selecting appropriate evaluation designs to reveal

insight about the program ' s impacts, cost-effectiveness, and implementation; and Act III discusses making use of the findings. Packed with relevant examples and detailed explanations, the book fully prepares readers to apply research methods in the practice of health program evaluation.

Julius Caesar Study Guide by Mocktime Publication

As more and more money is spent developing programs and services to solve health problems, how can one know if a specific health program works or what it would take to improve it? Aimed at addressing this issue, The Practice of Health Program Evaluation provides readers with the methods to evaluate health programs and the expertise to navigate the political terrain so as to work more effectively with decision makers and other groups. To convey these principles, Grembowski uses the metaphor of evaluation being a three-act play with a variety of actors and interest groups, each having a role that involves entering and exiting the "stage" at different points in the evaluation process.
