Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and cross-linguistic perspective. Solving nonlinear equations in Banach spaces (real or complex nonlinear equations, nonlinear systems, and nonlinear matrix equations, among others), is a non-trivial task that involves many areas of science and technology. Usually the solution is not directly affordable and require an approach using iterative algorithms. This Special Issue focuses mainly on the design, analysis of convergence, and stability of new schemes for solving nonlinear problems and their application to practical problems. Included papers study the following topics: Methods for finding simple or multiple roots either with or without derivatives, iterative methods for approximating different generalized inverses, real or complex dynamics associated to the rational functions resulting from the application of an iterative method on a polynomial. Additionally, the analysis of the convergence has been carried out by means of different sufficient conditions assuring the local, semilocal, or global convergence. This Special issue has allowed us to present the latest research results in the area of iterative processes for solving nonlinear equations as well as systems and matrix equations. In addition to the theoretical papers, several manuscripts on signal processing, nonlinear integral equations, or partial differential equations, reveal the connection between iterative methods and other branches of science and engineering.

Winner of the Pulitzer prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal - to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

In its 1500-year history, the English language has seen dramatic grammatical changes. This book offers a comprehensive and reader-friendly account of the major developments, including changes in word order, the noun phrase and verb phrase, changing relations between clausal constituents and the development of new subordinate constructions. The book puts forward possible explanations for change, drawing on the existing and most recent literature, and with reference to the major theoretical models. The authors use corpus evidence to investigate language-internal and language-external motivations for change, including the impact of language contact. The book is intended for students who have been introduced to the history of English and want to deepen their understanding of major grammatical changes, and for linguists in general with a historical interest. It will also be of value to literary scholars professionally engaged with older texts.

The fifth edition of *Understanding Central America* explains how domestic and global political and economic forces have shaped rebellion and regime change in Costa Rica, Nicaragua, El Salvador, Guatemala, and Honduras. John A. Booth, Christine J. Wade, and Thomas W. Walker explore the origins and development of the region's political conflicts and its efforts to resolve them. Covering the region's political and economic development from the early 1800s onward, the authors provide a background for understanding Central America's rebellion and regime change of the past forty years. This revised edition brings the Central American story up to date, with special emphasis on globalization, evolving public opinion, progress toward democratic consolidation, and the relationship between Central America and the United States under the Obama administration, and includes analysis of the 2009 Honduran coup d'etat. A useful introduction to the region and a model for how to convey its complexities in language readers will comprehend, *Understanding Central America* stands out as a must-have resource.

"This book began over a decade ago, in 2001, when I began working on the issue of internal displacement at the United Nations. I was surprised at the time by International Relations scholars' neglect of internally displaced persons (IDP) as an international issue. As I began my PhD, I realized that

deeper questions existed around the basic state practices that underpin policies towards both IDPs and refugees"--

ACCA F9 Financial Management Walter de Gruyter GmbH & Co KG This book, the second volume in A Linguistic History of English, describes the development of Old English from Proto-Germanic. Like Volume I, it is an internal history of the structure of English that combines traditional historical linguistics, modern syntactic theory, the study of languages in contact, and the variationist approach to language change. The first part of the book considers the development of Northwest and West Germanic, and the northern dialects of the latter, with particular reference to phonological and morphological phenomena. Later chapters present a detailed account of changes in the Old English sound system, inflectional system, and syntax. The book aims to make the findings of traditional historical linguistics accessible to scholars and students in other subdisciplines, and also to adopt approaches from contemporary theoretical linguistics in such a way that they are accessible to a wide range of historical linguists.

Advanced Engineering Electromagnetics ReadHowYouWant.com This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections. Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine by whom they were made and how. An international collaboration known as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information available about these fascinating remnants of the ancient world.

Bold, headstrong, and fabulously wealthy, Dutch traveller Alexine Tinne (1834 – 1869) made several excursions into the African interior, often accompanied by her mother, at a time when very few European women traveled. The *Fateful Journey* follows her trip with German zoologist Theodor von Heuglin, which took them through Egypt and Sudan in search of adventure and unknown regions in Central Africa. Drawing upon four years of research in the Tinne archives, and including never before published correspondence, photographs, and other documents, Robert Joost Willink presents a compelling account of their journey and its tragic ending. This exciting volume not only sheds light on Tinne's life and times, it also offers captivating insights into the world of European adventurers in the 19th century. An enthralling mix of adventure and careful scholarship, *The Fateful Journey* creates a powerful portrait of Alexine Tinne throughout her life, from her start as a rich heiress in the Netherlands to her end as the intrepid explorer who risked—and lost—everything on a daring, doomed quest.

This book addresses a particular and little-known form of writing, the prose dialogue, during the Late Antique period, when Christian authors adopted and transformed the dialogue form to suit the new needs of religious debate. Connected to, but departing from, the dialogues of Classical Antiquity, these new forms staged encounters between Christians and pagans, Jews, Manichaeans, and "heretical" fellow Christians. At times fiction, at others records of, or scripts for, actual debates, the dialogues give us a glimpse of Late Antique rhetoric as it was practiced and tell us about the theological arguments underpinning religious differences. By offering the first comprehensive analysis of Christian dialogues in Greek and Syriac from the earliest examples to the end of the sixth century CE, the present volume shows that Christian authors saw the dialogue form as a suitable vehicle for argument and apologetic in the context of religious controversy and argues that dialogues were intended as effective tools of opinion formation in Late Antique society. Most Christian dialogues are little studied, and often in isolation, but they vividly evoke the religious debates of the time and they embody the cultural conventions and refinements that Late Antique men and women expected from such debates.
