Addition And Subtraction Problem Types

Addition and Subtraction Word Problems by Problem Type Resource. By Jessica Boschen 6 Comments. This set of Addition and Subtraction Word Problems by Problem Type allows the teacher to differentiate the numbers for students and teach them to look at the context of a problem before working with the numbers. This has become my favorite resource to teach students to truly understand how to solve word problems, using models and strategies that work for the context of the problem.

Addition & Subtraction - Page 1 - Primary Resources

To solve addition and subtraction word problems, we try to read the question and look for keywords. The keyword list below will help to identify whether we have an addition or subtraction word problem. Some common addition keywords are: Add; Plus; More; Total; Increase; Together / Altogether; Combined; Sum; Grow; If we see these words, we likely have an addition word problem.

Addition and Subtraction Problems 3

A Subtraction Example – the Split Strategy. I teach the addition and subtraction strategies the same way. I start my mini-lesson with base ten blocks to demonstrate splitting the minuend and subtrahend. However, in the subtraction strategy, I have students use sticky notes also to mark the numbers throughout the process.

...

You might be relieved to hear that teaching addition and subtraction within word problems is a BREEZE after having taught Addition and Subtraction to 1000. Students typically get it right away, and as long as they have a solid foundation of adding and subtracting numbers, they usually enjoy this unit.

Addition & Subtraction Word Problems

Addition (usually signified by the plus symbol +) is one of the four basic operations of arithmetic, the other three being

subtraction, multiplication and division. The addition of two whole numbers results in the total amount or sum of those values combined. The example in the adjacent picture shows a combination of three apples and two apples, making a total of five apples.

Addition and Subtraction problems can be classified by the

type of action or relationship described in the problems. This

classification is a way to help children think about the action in

the problem and understand the situation or context. There are

four basic classes of problems: Join, Separate, Part-Part-

Whole, and Compare.

Addition and Subtraction Word Problems | Teaching Resources

Addition and Subtraction Vocabulary and Language. Being able to

solve each type of problem described above requires students to

master the vocabulary of addition and subtraction. e.g. how many in

total, altogether, combined, more than, difference, how many are

needed. Solving word problems both relies on and develops reading

and language skills.

for the action in the problem

36 Top Subtraction Word Problems Year 1 Teaching Resources

We have mentioned that children solve addition and

subtraction problems by focusing on the action in the

problem. We illustrated joining problems where the action

is a joining of two or more quantities (like 6 toy cars and

18 more toy cars). The opposite of joining is separating. In

many word problems the action involves separation of

quantities. For example, Louise has 36 cookies and gives

12 to Henry (12 cookies are separated from the original

quantity of 36).
