Additive Colors. The additive primary colors are red, green and blue (RGB). Combining one of these additive primary colors with equal amounts of another one results in the additive secondary colors of cyan, magenta and yellow.

Combining all three additive primary colors in equal amounts will produce the color white.

Additive Color Quiz - ASU

Answers to Questions about Additive and Subtractive Colors.

You probably learned in school that the

primary colors are red, yellow, and blue. Why aren't these same colors used for printing? ANS: It has to do with the quality of the pigment.

Ordinary paints are not perfect absorbers and reflect more than one wavelength,...

additive colors gizmo answer key - Bing

The Additive Colors Gizmo demonstrates how any color can be produced by varying the intensities of three primary colors of light: red, green, and blue (RGB).

Additive colors are produced directly by a light source such as a TV or a computer screen. The

Subtractive Colors Gizmo demonstrates how colors are produced by mixing pigments such as paint. As more pigments are added, more light is absorbed

and the resulting color becomes darker.

Subtractive Colors*

...
The rules of additive color mixing apply to color TV, computer monitors, projectors, stage and disco lights. These rules do not work at all when mixing pigments and paints. The three projectors above are illuminating three filters with white light. The red, green and blue filters transmit light of the same colors.

Additive Colors.

Launch Gizmo. Control
the intensity of red,
green, and blue
spotlights. Additive
colors can be observed
where the spotlights
overlap. The RGB value
of any point can be
measured. Just about
any color can be
created by mixing
varying amounts of
red, green, and blue
light.

Additive Colors
Gizmo :

ExploreLearning
In the Additive
Colors Gizmo,

students can
explore how red,
green, and blue
light can be
combined into a
wide range of
colors. By varying
the intensities of
these primary
colors of light,
virtually any color
can be created.
This mimics how
computer monitors
create colors using
red, green, and
blue diodes.
