Impeccable."—Wall Street Journal "A porthole into another world."—Scientific American "Brings science dissemination to a new level."—Science The most trusted explainer of the most mind-boggling concepts pulls back the veil of mystery that has too long cloaked the most valuable building blocks of modern science. Sean Carroll, with his genius for making complex notions entertaining, presents in his uniquely lucid voice the fundamental ideas informing the modern physics of reality. Physics offers deep insights into the workings of the universe but those insights come in the form of equations that often look like

gobbledygook. Sean Carroll shows that they are really like meaningful poems that can help us fly over sierras to discover a miraculous multidimensional landscape alive with radiant giants, warped space-time, and bewilderingly powerful forces. High school calculus is itself a centuries-old marvel as worthy of our gaze as the Mona Lisa. And it may come as a surprise the extent to which all our most cutting-edge ideas about black holes are built on the math calculus enables. No one else could so smoothly guide readers toward grasping the very equation Einstein used to describe his theory of general relativity. In the tradition of the legendary Richard

Feynman lectures presented sixty years ago, this book is an inspiring, dazzling introduction to a way of seeing that will resonate across cultural and generational boundaries for many years to come.

From #1 New York Times bestselling author Jennifer L. Armentrout comes a new novel in her Blood and Ash series... Is Love Stronger Than Vengeance? A Betrayal... Everything Poppy has ever believed in is a lie, including the man she was falling in love with. Thrust among those

who see her as a symbol of a monstrous kingdom, she barely knows who she is without the veil of the Maiden. But what she does know is that nothing is as dangerous to her as him. The Dark One. The Prince of Atlantia. He wants her to fight him, and that's one order she's more than happy to obey. He may have taken her, but he will never have her. A Choice.... Casteel Da' Neer is known by many names and many faces. His lies are as seductive as his touch. His truths as sensual as his bite. Poppy knows better than to trust him. He needs her alive, healthy, and whole to achieve his goals. But he's the only way for her to get what she wants—to find her brother Ian and see for herself if he has become a soulless Ascended. Working with Casteel instead of against him presents its own risks. He still tempts her with every breath, offering up all she's ever wanted. Casteel has plans for her. Ones that could expose her to unimaginable pleasure and unfathomable pain. Plans that will force her to look beyond everything she thought she knew about herself—about him. Plans that could bind their lives together in unexpected ways that neither kingdom is prepared for. And she's far too reckless, too hungry, to resist the temptation. A Secret... But unrest has grown in Atlantia as they await the return of their Prince. Whispers of war have become stronger, and Poppy is at the very heart of it all. The King wants to use her to send a message. The Descenters want her dead. The wolveren are growing more unpredictable. And as her abilities to feel pain and emotion begin to grow and strengthen, the Atlantians start to fear her. Dark secrets are at play, ones

steeped in the blood-drenched sins of two kingdoms that would do anything to keep the truth hidden. But when the earth begins to shake, and the skies start to bleed, it may already be too late.

When life looks radically different than the plan we have for ourselves, it's the lucky few that recognize God's plan is best. That's what adoptive mom Heather Avis learned, and that's the invitation of this book. As the mother of three adopted children - two with Down syndrome - Heather Avis has learned that it's truly the lucky few who get to live a life like hers, who actually recognize that God's plans are best, even when they seem so radically different from the plans we have for ourselves. When Heather started her journey into parenthood she never

thought it would look like this, never planned to have three adopted children, and certainly never imagined that two of them would have Down syndrome. But like most things God does, once she stepped into the craziness and confusion that comes with the unknown and the unplanned, she realized that they were indeed among the lucky few. Discover in this book what 70,000+ followers of Heather's hit Instagram account @macymakesmyday already know: the power of faith and family can help us stay strong in the toughest times. This book will also be especially touching to those with adopted family members or children with Down syndrome in their lives.

Life is full of choices-

of chances- of moments. Chances we regret not taking. Choices we wish we could change. And then there are the moments that define us. Kam was my choice... The one who stole my heart instantly. Kane was my chance... The one who set me ablaze with just one look. They were my moment... Two brothers that both owned a part of me. Two brothers that I loved in different ways for different reasons. One brother shattered my heart. The other put it back together. Both changed me forever. The Road to You is a standalone contemporary romance. El-Hi Textbooks in Print Penguin

From one of Spain's greatest writers—and the international bestselling, award-winning author of *The Infatuations*—comes an odyssey into the nature of identity and of time that weaves together fact and fiction into a completely original and unforgettable hybrid. "Stylish, cerebral...Mar í as is a startling talent...His prose is ambitious, ironic, philosophical, and ultimately compassionate." —The New York Times Called by its author a "false novel," *Dark Back of Time* begins with the tale of the odd effects of publishing *All Souls*, his witty and sardonic 1989 Oxford novel. *All Souls* is a book Mar í as swears to be fiction, but which its "characters"—the real-life dons and professors

and bookshop owners who have "recognized themselves"—fiercely maintain to be a roman à clef. With the sleepy world of Oxford set into fretful motion by a world that never "existed," *Dark Back of Time* begins an odyssey into the nature of identity and of time. Mar í as weaves together autobiography, a legendary kingdom, strange ghostly literary figures, halls of mirrors, a one-eyed pilot, a curse in Havana, and a bullet lost in Mexico.

"Advanced Everyday English is designed in very much the same mode as the first book (*Practical Everyday English with audio CD*) in that all of the examples will contain vocabulary and expressions you have studied on earlier pages. You will also find

many words from the first book, which will give you an opportunity to revise the material. In this second book there is more of what one might call "serious" vocabulary, but there are plenty of phrasal verbs and idioms as well. The book will be of particular benefit to those readers with an advanced level of English who wish to become (or who already are) interpreters, translators or teachers of English, or who simply want to be able to speak and understand English at a very high level. In addition, people who need to read English language journals or converse in English on a daily basis, either in business or for pleasure, will find it very useful."--Publisher's description.

A year-long study of the writing development of 27 first through third graders in an English/Spanish bilingual program was conducted during the 1980-81 school year. Samples of the children's writing were collected at four intervals, coded for computer tallying, and analyzed in terms of code-switching, spelling, punctuation and segmentation, structural features, stylistic devices, and content. Additionally, the context in which the writing developed was evaluated by classroom observations, teacher interviews, review of familial backgrounds, and a survey of the community language situation. Myths about bilingual language proficiency, biliteracy, bilingual education, teaching writing, and learning to write are all countered by evidence presented in this study. In a discussion of implications,

the concept of a whole language approach to writing instruction is supported, in which authentic and functional texts are offered to and produced by children. Examples of the children's writing with appropriate translations are given along with various tables. Informal follow-up information is presented in three epilogues dealing with changes in the researcher's commitment to the study's original writing theories, the writing of some students a year after the study; and a chronological outline of the demise of the bilingual program used in the study. Appendices list interview questions used for teachers and aides and categories for coding the writing data. This book contains 134 references. (ALL)

Second Lieutenant

Tommy Hart, a navigator whose B-25 was shot out of the sky in 1942, is burdened with guilt as the only surviving member of his crew. Now he is just another POW at the fiercely guarded Stalag Luft 13 in Bavaria. Then routine comes to a halt with the arrival of a new prisoner: First Lieutenant Lincoln Scott, an African American Tuskegee airman who instantly becomes the target of contempt from his fellow soldiers. When a prisoner is brutally murdered, and all the blood-soaked evidence points to Scott, Hart is tapped to defend the

soldier. In a trial rife with racial tension and raw conflict, where the lines between ally and enemy blur, there are those with their own secret motives, and a burning passion for a rush to judgment, no matter what the cost.

When a Mapuche chief suddenly goes missing, a British naturalist is asked to find him in the vast Argentine pampas. Clarke, a nineteenth-century English naturalist, roams the pampas in search of that most elusive and rare animal: the Legibrerian hare, whose defining quality seems to be its ability to fly. The local Indians, pointing skyward, report recent sightings of the hare but then ask Clarke to help them search for their missing chief as well. On further

investigation Clarke finds more than meets the eye: in the Mapuche and Voroga languages every word has at least two meanings. Witty, very ironic, and with all the usual Airian digressive magic, The Hare offers subtle reflections on love, Victorian-era colonialism, and the many ambiguities of language.
