[The House on Mango Street](#) Pearson Prentice Hall *Advances in the Analysis of Spanish Exclamatives* is the first book entirely devoted to Spanish exclamatives, a special sentence type often overlooked by contemporary linguists and neglected in standard grammatical

descriptions. The seven essays in this volume, each by a leading specialist on the topic, scrutinize the syntax--as well as the semantic and pragmatic aspects--of exclamations on theoretical grounds. The book begins by summarizing, commenting on, and evaluating previous descriptive and theoretical contributions on Spanish exclamatives. This introductory overview also contains a detailed classification of Spanish exclamative grammatical types, along with an analysis

of their main properties. Special attention is devoted in the book throughout to the syntactic structures displayed by exclamative patterns; the differences between exclamations and other speech acts (specifically questions and imperatives); the peculiar semantic denotation of exclamative words and their relationship to quantifiers denoting high degree; the semantics of adjectives and adverbs expressing extreme evaluation; the form and interpretation of negated and embedded exclamatives; the

properties of optative utterances; and the different ways in which expressive contents are related to unexpected reactions of the speaker, as well as possible knowledge shared by interlocutors. This groundbreaking volume provides a complete and accurate picture of Spanish exclamation by integrating its numerous component parts.
