Dr Guimberteau's photographs provide a detailed account of fascial architecture. The accompanying text explains what the photographs mean, clarifies the importance of the fascia, and sets out the implications of these findings for everyday therapeutic practice. This

beautifully illustrated book provides an introduction to Dr Guimberteau's groundbreaking work. He is the first person to publish video "movies" showing the structure of the fascia and how the fascia responds to. Based on what can be seen he has developed his own concept of the multifibrillar structural organisation of the body, wherein the "microvacuole" is the basic functional unit. His films confirm the continuity of fibres throughout the body thereby seeming to confirm the tensegrity theory, which provides the basis of many manual therapy and bodywork teachings. His work ties in with that of Donald Ingber on tensegrity within the cytoskeleton, and adds to the evidence linking the cytoskeleton to the extracellular matrix as described by James Oschman. The book and videos provide, for the first time, an explanatory introduction and explanation of these theories and link them to the visual evidence shown in the video. This material will be highly valued by osteopaths, massage therapists, chiropractors and others as it provides part of the scientific underpinning of their techniques, as well as an

explanation of what is happening when they use those techniques to treat their clients. So Guimberteau's material confirms what manual therapists already believed but didn't fully understand. He has provided an explanation of how fascial layers slide over each other and how adjacent structures can move independently in different directions and at different speeds while maintaining the stability of the surrounding tissues. *America Buys* McGraw Hill Professional Master the tools and techniques of mobile forensic investigations Conduct mobile forensic investigations that are legal, ethical, and highly effective using the detailed information contained in this practical guide. *Mobile Forensic Investigations: A Guide to Evidence Collection, Analysis, and Presentation, Second Edition* fully explains the latest tools and methods along with features, examples, and real-world case studies. On bookshelves around the world, surrounded by ordinary books bound in paper and leather, rest other volumes of a distinctly strange and grisly sort: those bound in human skin. Would you know one if you held it in your hand? In *Dark Archives*, Megan Rosenbloom seeks out the historic and scientific truths behind anthropodermic bibliopegy—the practice of binding books in this most intimate covering. Dozens of such books live on in the world's most famous libraries and museums. *Dark Archives* exhumes their origins and brings to life the doctors, murderers, and indigents whose lives are sewn together in this disquieting collection. Along the way, Rosenbloom tells the story of how her team of scientists, curators, and librarians

test rumored anthropodermic books, untangling the myths around their creation and reckoning with the ethics of their custodianship. A librarian and journalist, Rosenbloom is a member of The Order of the Good Death and a cofounder of their Death Salon, a community that encourages conversations, scholarship, and art about mortality and mourning. In *Dark Archives*—captivating and macabre in all the right ways—she has crafted a narrative that is equal parts detective work, academic intrigue, history, and medical curiosity: a book as rare and thrilling as its subject.

Reminiscent of Aimee Bender and Karen Russell, from the author of the new collection, *Awayland*—an enthralling book of stories that uses the world of the imagination to explore the heart of the human condition. Major literary talent Ramona Ausubel, author of *Sons and Daughters of Ease and Plenty*, combines the otherworldly wisdom of her much-loved debut novel, *No One Is Here Except All of Us*, with the precision of the short-story form. *A Guide to Being Born* is organized around the stages of life—love, conception, gestation, birth—and the transformations that happen as people experience deeply altering life events, falling in love, becoming parents, looking toward the end of life. In each of these eleven stories Ausubel's stunning imagination and humor are moving, entertaining, and provocative, leading readers to see the familiar world in a new way. In "Atria" a pregnant teenager believes she will give birth to any number of strange animals rather than a human baby; in "Catch and Release" a girl discovers the ghost of a Civil War hero living in the woods behind her house; and in "Tributaries" people grow a new arm each time they fall in love. Funny, surprising, and delightfully strange—all the stories have a strong emotional core; Ausubel's primary

concern is always love, in all its manifestations.

New York Times bestselling author Alan Dean Foster has always been on the cutting-edge of science fiction. In *Body, Inc.*, he creates a tomorrow where genetic manipulation has become ubiquitous, and the very meaning of what it is to be human is undergoing drastic transformation. In a world deeply wounded by centuries of environmental damage, two unlikely souls join forces: Dr. Ingrid Seastrom has stumbled into a mystery involving quantum-entangled nanoscale

implants—a mystery that just may kill her. Whispr is a thief and murderer whose radical body modifications have left him so thin he is all but two-dimensional. Whispr has found a silver data-storage thread, a technology that will make him wealthy beyond his wildest dreams. He is also going mad with longing for Dr. Ingrid Seastrom. Their quest to learn the secrets of the implant and the thread—which may well be the same secret—has led them to the South African Economic Combine, otherwise known as SAEC. Or, less respectfully, SICK. SICK, it seems, has the answers. Unfortunately, SICK has also got Napun Molé, a cold-blooded assassin whose genetic enhancements make him the equivalent of a small army. Molé has already missed one chance to kill Ingrid and Whispr and now he has followed them to South Africa. This time, he is not only going to succeed, he is going to make them suffer.
