Music after the Fall Boosey & Hawkes Incorporated
(Boosey & Hawkes Scores/Books). A rare inside look at the evolution of the world's leading classical publisher and how it works with composers to shape music history. Rather than wage a price war, Leslie Boosey and Ralph Hawkes decided to merge their rival businesses in 1930. Signing Bartok and Strauss and investing in talented young composers like Britten and Copland, the company fully came of age with the acquisition of masterpieces by Stravinsky, Rachmaninoff, and Prokofiev. The 1980s saw a new flowering, with impressive signings in America and Europe, but not without internal struggles. Distinguished journalist and broadcaster Helen Wallace vividly charts the company's progress through boom years and unexpected financial threats, and reveals how artistic foresight has been balanced with commercial reality. "A surprisingly gripping narrative. For those who wonder what really goes on in music publishing, it offers a fascinating read." BBC Music Magazine

Education about death and dying has been almost ignored in medical schools. Recently, however, it has become increasingly obvious that the preferences of dying patients are being ignored, leaving many patients to die lonely, scared, and in pain. There is a growing realization that physicians can help dying patients achieve a more peaceful death and increased recognition that good end-of-life care is not just the province of specialized hospice physicians or nurses. In *A Physician's Guide to Coping with Death and Dying* Jan Swanson and Alan Cooper, a physician and a clinical psychologist with many

years of experience, offer insights to help medical students, residents, physicians, nurses, and others become more aware of the different stages in the dying process and learn how to communicate more effectively with patients and their families. They also discuss the ways physicians and other caregivers can learn to reduce their own stress levels and avoid the risk of burnout, allowing them to achieve balance in their lives and be more effective professionally. The authors use case examples and thought-provoking exercises to provide a personal learning experience. *A Physician's Guide to Coping with Death and Dying* includes an extensive bibliography and a unique web resource section with contacts to many organizations working with patients suffering from life-threatening illnesses.

Choral Scores is an anthology of music exemplifying distinctive choral repertoire by the most noteworthy composers throughout the history of Western music. A companion volume to Denis Shrock's *Choral Repertoire* (Oxford 2009), it presents works of salient importance to the development of choral music in Western culture, representing the

music of the composers, eras, and movements discussed most prominently in that volume. Including 132 compositions by 124 different composers, each presented unabridged and in full score, and spanning the entirety of Western music history, from the medieval era through the twentieth century, and into the twenty-first, Choral Scores is the most thorough, and up-to-date collection of choral music available. Complete with an appendix offering literal translations of texts, as well as composer and genre indices, Choral Scores is an essential reference for choral scholars, teachers, and students alike.

In *The Race of Sound* Nina Sun Eidsheim traces the ways in which sonic attributes that might seem natural, such as the voice and its qualities, are socially produced. Eidsheim illustrates how listeners measure race through sound and locate racial subjectivities in vocal timbre—the color or tone of a voice. Eidsheim examines singers Marian Anderson, Billie Holiday, and Jimmy Scott as well as the vocal synthesis technology Vocaloid to show how listeners carry a series of assumptions about the nature of the voice and to whom it belongs. Outlining how the voice is linked to ideas of racial essentialism and authenticity, Eidsheim untangles the relationship between race, gender, vocal technique, and timbre while addressing an undertheorized space of racial and ethnic performance. In so doing, she advances our knowledge of the cultural-historical formation of the timbral politics of difference and the ways that comprehending voice remains central to understanding human experience, all the while advocating for a form of listening that would allow us to hear singers in a self-reflexive, denaturalized way.

"...the best extant map of our sonic shadowlands, and it has changed how I listen."—Alex Ross, *The New Yorker* "...an essential survey of contemporary music."—*New York Times* "...sharp, provocative and always on the money. The listening list alone promises months of fresh discovery, the main text a fresh new way of navigating the world of sound."—*The Wire* 2017 Music Book of the Year—Alex Ross, *The New Yorker* *Music after the Fall* is the first book to survey contemporary Western art music within the transformed political, cultural, and technological environment of the post–Cold War era. In this book, Tim Rutherford-Johnson considers musical composition against this changed backdrop, placing it in the context of globalization, digitization, and new media. Drawing connections with the other arts, in particular visual art and architecture, he expands the definition of Western art music to include forms of composition, experimental music, sound art, and crossover work from across the spectrum, inside and beyond the concert hall. Each chapter is a critical consideration of a wide range of composers, performers, works, and institutions, and develops a broad and rich picture of the new music ecosystem, from North American string quartets to Lebanese improvisers, from

electroacoustic music studios in South America to ruined pianos in the Australian outback. Rutherford-Johnson puts forth a new approach to the study of contemporary music that relies less on taxonomies of style and technique than on the comparison of different responses to common themes of permission, fluidity, excess, and loss.

Sacred Knowledge is the first well-documented, sophisticated account of the effect of psychedelics on biological processes, human consciousness, and revelatory religious experiences. Based on nearly three decades of legal research with volunteers, William A. Richards argues that, if used responsibly and legally, psychedelics have the potential to assuage suffering and constructively affect the quality of human life. Richards's analysis contributes to social and political debates over the responsible integration of psychedelic substances into modern society. His book serves as an invaluable resource for readers who, whether spontaneously or with the facilitation of psychedelics, have encountered meaningful, inspiring, or even disturbing states of consciousness and seek clarity about their experiences. Testing the limits of language and conceptual frameworks, Richards makes the most of experiential phenomena that stretch our understanding of reality, advancing new frontiers in the study of belief, spiritual awakening, psychiatric treatment, and social well-being. His findings enrich humanities and scientific scholarship, expanding work in philosophy, anthropology, theology, and religious studies and bringing depth to research in mental health, psychotherapy, and psychopharmacology.
