This book is focused on the marine mammalian groups the Otariidae and the Odobenidae, otherwise known as fur seals, sea lions and the walrus. In 30 chapters, more than 60 authors from 30 institutions and 13 nationalities, discuss a broad suite of topics from maternal care and mating behavior, through play, cognition and personality, to adaptation to life in the Anthropocene. The authors explore the behaviors that have allowed these semi-aquatic mammals to thrive in the marine realm. Many populations have recovered following historical decimation, with interesting evolutionary consequences which are explored. Detailed, selected, individual species descriptions are also provided, showcasing the behavioral diversity of this engaging, adaptive and highly successful group of marine mammals.

Published in association with The Online Learning Consortium. Written by pioneers in the field of online learning, Leading the e-Learning Transformation of Higher Education is a professional text that offers insights and guidance to the rising generation of leaders in the field of higher education. It explains how to integrate online learning into an institution during a period of rapid social and institutional change. This important volume: • Shares success stories, interviews, cases and insights from a broad range of leadership styles • Reviews how technology is transforming higher education worldwide • Provides an overview of how distance education is organized in a range of institutional settings • Breaks down current leadership challenges in both unit operations and institutional policy This volume launches the new Stylus series that is aimed at the online learning and distance education market. It offers readers the opportunity to benefit from the collective experience and expertise of top leaders in the field. All of the contributors have held leadership roles in national and international distance education organizations. Five of the contributors have been recognized as Sloan Consortium Fellows in 2010 and they have all collaborated with the Institute for Emerging Leaders in Online Learning. These contributors have helped pave the way and now share their insights, advice, and broad vision with the future leaders of the field.

This document is designed to be a resource for those Linux users wishing to seek clarification on Linux/UNIX/POSIX related terms and jargon. At approximately 24000 definitions and two thousand pages it is one of the largest Linux related dictionaries currently available. Due to the rapid rate at which new terms are being created it has been decided that this will be an active project. We welcome input into the content of this document. At this moment in time half yearly updates are being envisaged. Please note that if you wish to find a 'Computer Dictionary' then see the 'Computer Dictionary Project' at <http://computerdictionary.tsf.org.za/> Searchable databases exist at locations such as: <http://www.swpearl.com/eng/scripts/dictionary/> (SWP) Sun Wah-PearL Linux Training and Development Centre is a centre of the Hong Kong Polytechnic University, established in 2000. Presently SWP is delivering professional grade Linux and related Open Source Software (OSS) technology training and consultant service in Hong Kong. SWP has an ambitious aim to promote the use of Linux and related Open Source Software (OSS) and Standards. The vendor independent positioning of SWP has been very well perceived by the market. Throughout the last couple of years, SWP becomes the Top Leading OSS training and service provider in Hong Kong. <http://www.geona.com/dictionary?b=Geona>, operated by Gold Vision Communications, is a new powerful search engine and internet directory, delivering quick and relevant results on almost any topic or subject you can imagine. The term "Geona" is an Italian and Hebrew name, meaning wisdom, exaltation, pride or majesty. We use our own database of spidered web sites and the Open Directory database, the same database which powers the core directory services for the Web's largest and most popular search engines and portals. Geona is spidering all domains listed in the non-adult part of the Open Directory and millions of additional sites of general interest to maintain a fulltext index of highly relevant web sites.

But since that time the site has evolved to become a RFC distribution site, linux news site and a locally written technology news site (with bad grammar :) with focus on Linux while also containing articles about anything and everything we find interesting in the computer world. LinuxDig.Com contains about 20,000 documents and this number is growing everyday! <http://linux.about.com/library/glossary/blglossary.htm> Each

month more than 20 million people visit About.com. Whether it be home repair and decorating ideas, recipes, movie trailers, or car buying tips, our Guides offer practical advice and solutions for every day life. Wherever you land on the new About.com, you'll find other content that is relevant to your interests. If you're looking for "How To" advice on planning to re-finish your deck, we'll also show you the tools you need to get the job done. If you've been to About before, we'll show you the latest updates, so you don't see the same thing twice. Microfluidics and lab-on-a-chip have, in recent years, come to the forefront in diagnostics and detection. At point-of-care, in the emergency room, and at the hospital bed or GP clinic, lab-on-a-chip offers the potential to rapidly detect time-critical and life-threatening diseases such as sepsis and bacterial meningitis. Furthermore, portable and user-friendly diagnostic platforms can enable disease diagnostics and detection in resource-poor settings where centralised laboratory facilities may not be available. At point-of-use, microfluidics and lab-on-chip can be applied in the field to rapidly identify plant pathogens, thus reducing the need for damaging broad spectrum pesticides while also reducing food losses. Microfluidics can also be applied to the continuous monitoring of water quality and can support policy-makers and protection agencies in protecting the environment. Perhaps most excitingly, microfluidics also offers the potential to enable entirely new diagnostic tests that cannot be implemented using conventional laboratory tools. Examples of microfluidics at the frontier of new medical diagnostic tests include early detection of cancers through circulating tumour cells (CTCs) and highly sensitive genetic tests using droplet-based digital PCR. This Special Issue on "Advances in Microfluidics Technology for Diagnostics and Detection" aims to gather outstanding research and to carry out comprehensive coverage of all aspects related to microfluidics in diagnostics and detection.

This book closely interrogates the construct of identity and the role it plays in career development. It provides guidance for HRD practitioners and researchers who create career development programs through a typology of different categories of identity, such as demographics, life events, and career histories. The book presents a framework for considering and addressing career development from a critically reflective perspective of identity as a result of choice, chance, and adaptation. It offers a comprehensive understanding and awareness of tacit, nuanced, and stigmatized issues that were once shameful but have now become more socially acceptable. As a result, HRD practitioners can design programs and resources that have a richness and relevance that might heretofore be lacking. The book also offers guidance for individuals as they take charge of their own identities and career trajectories in an increasingly complex and unpredictable working environment.

Comprehensive, Rigorous Prep for MCAT Biology The MCAT Biology Book provides a comprehensive overview of MCAT biology appropriate for all pre-med students preparing for the MCAT exam. In twenty-one chapters, the basics of biology are described in easy-to-understand text. Illustrations help emphasize relevant topics and clarify difficult concepts. Each chapter concludes with a set of problems modeled after the MCAT exam, with complete explanation of the answers. Also, includes a thorough analysis of the MCAT verbal section. Authors Nancy Morvillo and Matthew Schmidt both obtained their Ph.D. in genetics from the State University of New York at Stony Brook. **Biology Directions** [Barrhead] : Alberta Distance Learning Centre

Weeds hold an enigmatic and sometimes-controversial place in agriculture, where they are generally reviled, grudgingly tolerated, and occasionally admired. In most cases, growers make considerable effort to reduce the negative economic impact of weeds because they compete with crops for resources and hinder field operations, thereby affecting crop productivity and quality, and ultimately the sustainability of agriculture. Weed control in production agriculture is commonly achieved through the integration of chemical, biological,

and mechanical management methods. Chemicals (herbicides) usually inhibit the growth and establishment of weed plants by interfering with various physiological and biochemical pathways. Biological methods include crop competition, smother crops, rotation crops, and allelopathy, as well as specific insect predators and plant pathogens. Mechanical methods encompass an array of tools from short handled hoes to sophisticated video-guided robotic machines. Integrating these technologies, in order to relieve the negative impacts of weeds on crop production in a way that allows growers to optimize profits and preserve human health and the environment, is the science of weed management.

The second volume of the series on inorganic biochemistry and bio physics is singularly devoted to magnetic resonance on systems of high molecular complexity. Recently, there have been important advances in magnetic resonance studies of polymers; these advances touch on all aspects of magnetic resonance, both theoretical and applied. Particular emphasis is placed here on multipulse experiments. We believe such an report will be of considerable interest to the readers of our series owing to the importance of magnetic resonance techniques in the investigation of biopolymers. Ivano Bertini Harry Gray Series Editors Preface This book is a record of the Proceedings of the International Symposium on "Advanced Magnetic Resonance Techniques in Systems of High Molecular Complexity", which was held in Siena between 15 and 18 May 1985. The idea of the meeting is due to Proff. N.M. Atherton, G. Giacometti and E. Tiezzi with the aim of honouring the scientific personality of Prof. S.I. Weissman. The meeting has been organized with the assistance of a National Committee formed by R. Basosi, I. Bertini, P. Bucci, C. Corvaia, A. Gamba, G. Martini, G.F. Pedulli, P.A. Temussi, and C.A. Veracini. The invited lecturers responded enthusiastically and a comprehensive picture of the theoretical and practical aspects of magnetic resonance could be therefore provided. The book contains all the plenary lectures delivered during the meeting and also a wide selection among the huge amount of contributions collected by the organizers.

Anania Shirakatsi's 7th century manuscript Tvabanutiun (Arithmetic) is the world's oldest preserved manuscript on arithmetic. It contains interesting detailed explanations of the methods he has developed for teaching arithmetic to beginners and to first grade children. Shirakatsi's methods have been successfully used over centuries in Armenia. Even though times have changed, his methodology continues to be as effective in the contemporary diverse classroom environment as it has been since the 7th century.

EXPERIMENTS IN BIOCHEMISTRY: A HANDS-ON APPROACH, Second Edition features a variety of hands-on, classroom tested experiments that are proven to work and can be completed in a normal lab period. The manual's stand-alone experiments are effective in courses meeting only once a week, giving students a broad overview of the subject matter. A more comprehensive set of experiments is also available and allows students to delve further into each of the topics presented. The Second Edition also features new and revised experiments, including a new experiment that involves cloning the barracuda LDH gene! Students and professors will also find expanded problem sets in this edition. Tip boxes, located throughout the text, provide pointers to students on how to perform the experiment at hand, while Essential Information boxes highlight pertinent information that will help the student complete the experiment. The second edition continues to include references and further readings at the end of each chapter. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

MEMs Materials and Processes Handbook" is a comprehensive reference for researchers searching for new materials, properties of known materials, or specific processes available for MEMS fabrication. The content is separated into distinct sections on "Materials" and "Processes". The extensive Material Selection Guide" and a "Material Database" guides the reader through the selection of appropriate materials for the required task at hand. The "Processes" section of the book is organized as a catalog of various microfabrication processes, each with a brief introduction to the technology, as well as examples of common uses in MEMs.

Medical acronyms and abbreviations offer convenience, but those countless shortcuts can often be confusing. Now a part of the popular Dorland's suite of products, this reference features thousands of terms from across various medical specialties. Its alphabetical arrangement makes for quick reference, and expanded coverage of symbols ensures they are easier to find. Effective communication plays an important role in all medical settings, so turn to this trusted volume for nearly any medical abbreviation you might encounter. Symbols section makes it easier to locate unusual or seldom-used symbols. Convenient alphabetical format allows you to find the entry you need more intuitively. More than 90,000 entries and definitions. Many new and updated entries including terminology in expanding specialties, such as Nursing; Physical, Occupational, and Speech Therapies; Transcription and Coding; Computer and Technical Fields. New section on abbreviations to avoid, including Joint Commission abbreviations that are not to be used.

Incorporates updates suggested by the Institute for Safe Medication Practices (ISMP).

Weeds are successful plants, but on their own terms. Looking at weeds from an ecological viewpoint, emphasising the way in which one species interacts with others, the authors show that weeds are questionable mainly in that they are out-of-place.

Contemporary Issues in Learning and Teaching looks at current issues across the three key areas of policy, learning and practice. It will help you to think critically on your Education course, and to make connections between the processes of learning and the practicalities of teaching. The book addresses key issues in primary, secondary and special education, and includes examples from all four countries of the UK. The contributors reflect on current thinking and policy surrounding learning and teaching, and what it means to be a teacher today. Looking at the practice of teaching in a wider context allows you to explore some of the issues you will face, and the evolving expectations of your role in a policy-led environment. The book focuses on core areas of debate including: - education across different contexts and settings - teaching in an inclusive environment - Continuing Professional Development (CPD) for practitioners Each chapter follows the same accessible format. They contain case studies and vignettes providing examples and scenarios for discussion; introduction and summary boxes listing key issues and concepts explored in the chapter; key questions for discussion reflection; and further reading. This essential text will be ideal for undergraduate and postgraduate courses, including BEd/BA degrees, initial teacher-training courses, and Masters in Education programmes. All editors and contributors are based in the Faculty of Education at Glasgow University, UK.

Get to know the sociopolitical context behind microaggressions Microaggressions are brief, everyday exchanges that send denigrating messages to certain individuals because of their group membership (e.g., race, gender, culture, religion, social class, sexual orientation, etc.). These daily, common manifestations of aggression leave many people feeling vulnerable, targeted, angry, and afraid. How has this become such a pervasive part of our social and political rhetoric, and what is the psychology behind it? In Microaggression Theory, the original research team that created the microaggressions taxonomy, Gina Torino, David Rivera, Christina Capodilupo, Kevin Nadal, and Derald Wing Sue, address these issues head-on in a fascinating work that explores the newest findings of microaggressions in their sociopolitical context. It delves into how the often invisible nature of this phenomenon prevents perpetrators from realizing and confronting their own complicity in creating psychological dilemmas for marginalized groups, and discusses how prejudice, privilege, safe spaces, and cultural appropriation have become themes in our contentious social and political discourse. Details the psychological effects of microaggressions in separate chapters covering clinical impact, trauma, related stress syndromes, and the effect on perpetrators Examines how microaggressions affect education, employment, health care, and the media Explores how social policies and practices can minimize the occurrence and impact of microaggressions in a range of environments Investigates how microaggressions relate to larger social movements If you come across the topic of microaggressions in your day-to-day life, you can keep the conversation going in a productive manner—with research to back it up!

Issues concerning the enrollment of adults in degree programs in countries belonging to the Organisation for Economic Cooperation and Development are considered. Of concern are policies and institutional practices that affect adult participation in degree studies. The growing importance of continuing academic and professional education is addressed, along with the impact of new information and telecommunication technologies and their importance for distance higher education and independent study. In addition to an overview of adult demand for education and training and the role of higher education, attention is directed to: participation rates of adult students; characteristics of adult students; organizational policies and practices (e.g., admissions, part-time and distance modes and methods of study, credit transfer); and financial support to institutions and students. Comprehensive country surveys were completed by a number of countries (including Austria, Canada, France, West Germany, Ireland, Sweden, the United Kingdom, and the United States), while partial information was obtained from Australia, Finland, and Japan. A DEFINITIVE TEXT ON DEVELOPING CIRCUIT SIMULATORS Circuit Simulation gives a clear description of the numerical techniques and algorithms that are part of modern circuit simulators, with a focus on the most commonly used simulation modes: DC analysis and transient analysis. Tested in a graduate course on circuit simulation at the University of Toronto, this unique text provides the reader with sufficient detail and mathematical rigor to write his/her own basic circuit simulator. There is detailed coverage throughout of the mathematical and numerical techniques that are the basis for the various simulation topics, which facilitates a complete understanding of practical simulation techniques. In addition, Circuit Simulation: Explores a number of modern techniques from numerical analysis that are not synthesized anywhere else Covers network equation formulation in detail, with an emphasis on modified nodal analysis Gives a comprehensive treatment of the most relevant aspects of linear and nonlinear system solution techniques States all theorems without proof in order to maintain the focus on the end-goal of providing coverage of practical simulation methods Provides ample references for further study Enables newcomers to circuit simulation to understand the material in a concrete and holistic manner With problem sets and computer projects at the end of every chapter, Circuit Simulation is ideally suited for a graduate course on this topic. It is also a practical reference for design engineers and computer-aided design practitioners, as well as researchers and developers in both industry and academia.
