In order to determine whether two participants in a discussion are in real dis/agreement, one must compare their propositions. Comparison presupposes yardsticks in common. Analysis of Dis/agreement thematises such yardsticks, in that it demonstrates the existence, content and factual significance of a relatively well-delimited set of proposition types and proposition patterns, with their accompanying tenability criteria and motivating interests. The book is a work in the field of legal theory by virtue of its demonstrating how lawyers' power of judgement is constituted in and through these yardsticks. The book is interdisciplinary by virtue of its demonstrating how the same yardsticks come into play more generally in argumentation formulated in everyday language, i.e. independently of law. And the book is a work in the field of philosophy by virtue of its demonstrating the existence and factual significance of language and argumentation actions with a certain independence in relation to the level of controversial fundamental philosophical positions.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Comparative Company Law provides a systematic and coherent exposition of company law across jurisdictions, augmented by extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.

This is volume 2 of a two-volume work. It discusses a set of ten sectoral plans about natural environment, agriculture and husbandry, urban environment and social welfare, infrastructures and mobility, cultural heritage, tourism and public use, landscape, sustainability, socio-demography, economic development and governance. The sectoral plans are accompanied by eighteen pilot projects that develop in detail their most sensitive or relevant parts. The book is intended for planners and researchers from various disciplines, including urban planning, forestry, agriculture, cultural and touristic management, and sustainability studies. The book presents a unique example of integral planning at different scales and across different types of landscapes found on the outskirts of metropolitan areas. It features a sustainability orientated integrated plan to maximise the performance of the south-central area of the Calderona Mountain Range, Spain (Sierra Calderona). It is informed and driven by social, cultural, perceptual, sustainability and economic factors supported by a participative process, acknowledging the frequent conflict between the natural and cultural values found there and the strong pressure for transformation and public use. Incorporating new methodologies and graphical systems for regional and local planning, it constitutes an example of balanced and multidisciplinary planning, based on principles of sustainability, system thinking, new governance and local adaptation.

This is an open access book. Cultural policy plays a crucial role in shaping societies, influencing cultural

expressions, and advancing sustainable development. Laws and regulations related to culture, both at the national and international levels, play a key role in regulating and protecting cultural heritage and supporting a healthy cultural ecosystem. The First International Conference on Cultural Policy and Sustainable Development (ICPSD) aims to explore the impact of cultural policies in democratic and nondemocratic regimes. This conference will serve as a platform for scholars, policymakers, and practitioners to exchange ideas, share experiences, and discuss strategies to promote cultural diversity, creativity, and sustainability in different political contexts. Internationally, various agreements such as the UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions underscore the importance of cultural policies in supporting sustainable development and promoting cultural diversity (UNESCO Convention 2005, n.d.). At the national level, laws such as the Cultural Law in Indonesia establish a framework for the protection and development of culture, as well as provide a legal basis for inclusive and sustainable cultural policy-making (Law Number 5 of 2017 concerning the Advancement of Culture, n.d.). In democratic regimes, cultural policies are often developed through participatory processes, reflecting the values and aspirations of diverse communities. These policies aim to support cultural expression, protect cultural heritage, and promote cultural rights, thereby contributing to social cohesion and inclusive development. However, challenges such as funding limitations, cultural commodification, and the impact of digital technology require ongoing dialogue and innovation in policy approaches. On the other hand, cultural policies in nondemocratic regimes are often used as tools for political control, censorship, and the promotion of state ideology. Nevertheless, cultural practitioners and activists in these contexts demonstrate resilience and creativity in navigating restrictive environments, often using digital technology to amplify their voices and preserve cultural identity. In various countries, existing legislation greatly influences the implementation of cultural policies and sustainable development. In Indonesia, for example, Law Number 5 of 2017 concerning Culture serves as the main foundation for the development of sustainable cultural policies. This law promotes the protection, preservation, development, utilization, and fostering of culture as an integral part of national development (Law Number 5 of 2017 concerning the Advancement of Culture, n.d.). Cultural Policy and Sustainable Development are interrelated concepts and are the main focus of this conference, where appropriate cultural policies can strengthen sustainable development, reinforce cultural identity, and improve the quality of life for communities. In the context of the conference theme, Cultural Policies in Democratic and Nondemocratic Regimes, it is important to consider the differences in cultural policy approaches between these two types of regimes. This forum aims to facilitate communication among Law Faculty Academics worldwide with the agenda of the 1st International Conference on Cultural Policy and Sustainable Development (ICPSD): "Cultural Policies in Democratic and Nondemocratic Regimes".

Economic, social, and cultural rights are finally coming of age. This book brings together all essential documents, materials, and case law relating to the International Covenant on Economic, Social and Cultural Rights (ICESCR) - one of the most important human rights instruments in international law - and its Optional Protocol. This book presents extracts from primary materials alongside critical commentary and analysis, placing the documents in their wider context and situating economic, social, and cultural rights within the broader human rights framework. There is increasing interest internationally, regionally, and in domestic legal systems in the protection of economic, social, and cultural rights. The Optional Protocol of 2008 allows for individual communications to be made to the UN Committee on Economic, Social and Cultural Rights after its entry into force in 2013. At the regional level, socio-economic rights are well embedded in human rights systems in Europe, Africa and the Americas. At the national level, constitutions and courts have increasingly regarded socio-economic rights as justiciable, narrowing the traditional divide with civil and political rights. This book contextualises these developments in the context of the ICESCR. It provides detailed analysis of the ICESCR structured around its articles, drawing on national as well as international case law and materials, and containing all of the key primary materials in its extensive appendices. This book is indispensable for the judiciary, human rights practitioners, government legal advisers and agencies, national human rights institutions, international organisations, regional human rights bodies, NGOs and human rights activists, academics, and students alike.

Generations X and Y are plugged into the contemporary world of consumption, popular culture, and the internet. These generations treat knowledge and belief as a more flexible concept, often focusing on the practical rather than the theoretical and often drawing on conflicting sources in both popular and cyber culture. Their approach to religious belief and practice requires a new way of studying the sociology of religion. 'Sociology of Religion for Generations X and Y' examines key world religions - Buddhism, Christianity and Islam - as well as newer religious groups, such as Scientology, New Age, Witchcraft and online communities such as Jediism and Matrixism. The book covers a range of key concepts: secularisation and modernisation, re-enchantment, the 'McDonaldisation' of society, and the easternisation of the west. Each chapter opens with a case study from popular culture or the internet which takes the reader to the heart of the topic being discussed.

Employing both classical sociological theory and contemporary critical theory, 'Sociology of Religion for Generations X and Y' and fifteen territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to explain where contemporary religion and spirituality are coming from, where they are now, and where they are going.

This classic collection of essays by E.P. Thompson, one of England's most renowned socialist voices, remains a staple text in the history of Marxist theory. The bulk of the book is dedicated to Thompson's famous polemic against Louis Althusser and what he considers the reductionism and authoritarianism of Althusserian structuralism. In lively and erudite prose, Thompson argues for a self-critical and unapologetically humanist Marxist tradition. Also included are three essays of considerable importance to the development of the New Left.

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 195 countries

monitor trends in democracy and track improvements and setbacks in freedom worldwide. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.
