TURNING THE SHIP AROUND Joe Ferreira specializes in spectacular turnarounds. However, none of Joe's hard-won personal or professional successes prepared him for becoming the CEO of an organization the same week it was threatened with imminent dissolution by the United States government. Faced with a toxic legacy culture and the worst performance metrics in his industry, Joe drew upon his most momentous personal and professional life experiences--almost failing out of high school, captaining a boat through the treacherous currents of the Bermuda Triangle, letting go of micromanagement tendencies by delegating critical medical procedures--to keep a lifesaving enterprise from losing its federal certification. A management memoir, the story of Uncomfortable Inclusion will intrigue, infuriate, and inspire leaders who are eager to turn their organizations into world leaders. As the title suggests, the book's most engaging and enlightening takeaway is Joe's ultimate commitment to uncomfortable inclusion, a management practice he proves is the single most important factor for success. Joe's trials, tribulations, and ultimately sustainable triumphs as part of the journey of transforming a company from terrible to trailblazing offers encouragement to leaders on how to best invest in their company to achieve great results.

This book provides a critical and updated analysis of the nature of the EU's strategic partnership diplomacy, and of the partnerships themselves, in times of power shift and contestation. It links with key aspects of the EU's Global Strategy; it brings together a strong list of experts who work within a clear framework for analysis; and it deals not only with the substance of the policy but also with the ways in which the policy as a whole has emerged, is conducted and might develop in the future. In offering an inclusive set of case studies and diverse perspectives, this book aims to advance both conceptualization and analysis of the implementation of the established EU partnerships. The book highlights the notion of strategic partnership as a foreign policy instrument to support EU external action in a context of multilevel change and crisis; its policy dimension as a gradually separated, but not separable policy within the Union's external action; the institutional component given the emergence of SPs as a sort of self-preserving institutional platform allowing for denser and deeper cooperation in various policy areas; and the implications for the EU's self-conception as an international actor with a global identity and role.

Wellbeing in the workplace is an essential element in fostering a worker's sense of being valued, ensuring their engagement, and ultimately leading to higher levels of productivity and organizational performance. This important book specifically adds to the discussion by taking a global perspective, and evaluates wellbeing in the workplace in different countries, identifying both universal issues and specific cultural issues. Chapter authors have been drawn from across five continents and eleven countries to provide ground-breaking research in wellbeing from different regional perspectives, looking at both developed and developing world scenarios. What is clear throughout the book is that organizations that are not people-centered undermine their capacity to attain and maintain quality standards, high performance, and competitiveness. Organizational concerns about workers' wellbeing are growing exponentially due to the global VUCA (volatile, uncertain, complex, ambiguous) environment. In this environment, organizational success is no longer simply based on short-term revenue maximization, capital investments, or sales, but increasingly depends on people's wellbeing, human capital, and the development of human talent to ensure sustained and sustainable growth and performance.
