JavaScript Scripting Reference - Adobe Inc.

Acrobat and Reader X, 9.3, and 8.2 enable enhanced security by default. Adobe recommends that you enable enhanced security if it is not already enabled, and that you bypass restrictions only for trusted content.

Adobe Acrobat Scripting Guide
JavaScript is the cross-platform scripting language of the Adobe Acrobat family of products that includes

Acrobat Professional, Acrobat Standard, and Adobe Reader. Through JavaScript extensions, the viewer application and its plug-ins expose much of their functionality to document authors, form designers, and plug-in developers.

- Easily understood, detailed information and examples of the Designer calculation and scripting features
- References to other resources where you can learn more about Designer scripting and related technologies

After reading this guide, you should be equipped to start using Designer calculations and scripts.

Acrobat User Guide - Adobe Help Center

```
var val = prompt("Enter a value"); alert("You entered " + val);
```

We already know what to do with the second line, to replace the prompt () function call with something that Acrobat understands, we will use the app.response () method. For more information about this method, see the Acrobat JavaScript API Reference.

Technical Note #5430 Version : Acrobat 6 - Adobe Inc.

The scripting host in a Web browser exposes the "host objects" such as window, document

(DOM) and location objects to the JavaScript engine. Similarly, in Adobe Reader, Adobe Acrobat and other applications, the viewer exposes several host objects to the JavaScript engine. These host objects are described in two documents:
