The Oxford Handbook of Qualitative Research John Wiley & Sons
Communication is changing rapidly around the world, particularly in Africa, where citizens are embracing digital technologies not only to improve not only interpersonal communication but also the state of their financial well-being. This book investigates these transformations in Nigeria ' s booming communication industry. The book traces communications in Nigeria

back to pre-colonial indigenous communications, through the development of telecommunication, broadcasting networks, the press, the Nigerian film industry (' Nollywood ') and on to the digital era. At a time when Western voices still dominate the academic literature on communication in Africa, this book is noteworthy in drawing almost exclusively on the expertise of Nigerian-based authors, critiquing the discipline from their own lens and providing an important contribution to the decolonisation of communication studies. The authors provide a holistic analysis of the sector, encompassing print journalism, broadcast journalism, public relations, advertising, film, development communication, organisational communication and strategic

communication. Analysis of the role of digital technologies is woven throughout the book, concluding with a final section theorising the future of communication studies in Nigeria in the light of the digital media revolution. Robust in its theoretical and methodological underpinnings, this book will be an important reference for researchers of media and communication studies, and those working on Africa specifically.

A total CBT training solution, with practical strategies for improving educational outcomes.
Teaching and Supervising

Cognitive Behavioral Therapy is the first comprehensive package to provide empirically-validated CBT training and supervisory techniques. Applicable to a variety of behavioral health care disciplines, this multi-modal guide provides educators with the information and tools that can help improve educational outcomes. An examination of CBT developments over the past twenty years leads into a discussion of practical applications for improving CBT education, while addressing the technological advances that facilitate dissemination and the specific challenges posed to confidentiality and patient care. The digital component contains additional audio and video content, plus downloadable worksheets that reinforce and expand upon the

strategies presented. Coverage includes advice geared specifically toward the most commonly-encountered problems, with video of training sessions that address issues like frustration with patients, disbelief in psychotherapy, dislike of the method, and lack of skills. Readers will gain insight into effective goal setting, and implement a structured approach to supervision. Examine existing literature and research on training, supervision, and evaluation Integrate theory with practical strategies to improve learning outcomes Customize training approaches to specifically suit different professional groups Fit the methods to the environment, including workshops, webinars, and podcasts Mental health professionals who favor an

empirically-based approach to therapy will appreciate the effectiveness of an empirically-based approach to pedagogy. Backed by over two decades of CBT research and the insight of leading CBT experts, Teaching and Supervising Cognitive Behavioral Therapy provides trainers with the tools and information they need to improve therapist educational outcomes.

Nowadays, the Internet has become an irreplaceable tool, feeding us information about new innovations and the evolution of the markets relating to all human activities. What the Internet lacks, though, is a guiding narrative thread, which is crucial to understand the evolution from old technologies into the technologies available today, and to benefit from the commentary which could elucidate that process of evolution. In spite of its inherent richness, no encyclopedia can constitute the one and only referential information source. The actors involved also have the right to be heard: all those who have devoted their working lives to the collective effort of edifying networks can, of course, present their personal views about the evolution of the world of telecommunications, and thus provide invaluable testimony to companies in this area

who can make use of it. It is that approach which is adopted in this book. Whilst the primary objective of this book is to encourage SMEs to use digital technologies, and help them to organize with that goal in mind, it has proved necessary to describe the transformations currently under way in the field of networks, and to outline the efforts to obtain a competitive edge in terms of clerical applications, compare the various techniques that are available for high data rate communications, and touch upon the advent of the "Internet of Things", cloud computing and various new multimedia technologies. All in all, this book should help companies – particularly SMEs – to garner overall information about the current movement in the area of networking, and assist them in putting in place and managing their own communications systems.

Learning with and about Technologies and Computing** IGI Global Distance education and online learning are interchangeable terms used to describe the delivery of educational content, whereby the student and the instructor are separated by geography, time, or both. Within the domain of business education, approximately one-third of all business schools offer online business programs, and many more are expected to follow in this direction. Considerable attention is therefore being given by business educators to the refinement of pedagogical approaches in their distance learning offerings. The growth in attention is reflected in the rising number of academic papers related to distance learning methods which appear in leading business journals, as well as the growing number of workshops, research seminars and online forums on the topic. The objective of this book is to consolidate state-of-the-art knowledge on distance learning methods, best practices, and research findings as they relate to online business education. This exposure would help inform business faculty, administrators and course designers on how to optimize distance courses in the various sub-disciplines of business to achieve the most beneficial results

for business students.

Great Webinars "Great Webinars provides a profoundly practical and easy-to-follow template for creating and facilitating stimulating webinars that engage learners as active participants, while creating the kind of energetic 'buzz' that is the hallmark of successful learning experiences. The book is sure to benefit both seasoned instructors and subject matter experts who are new to teaching. I sure wish this book had existed when I began conducting webinars back in the mid 1990s." Carol Willett, former chief learning officer, US Government Accountability Office "Not only has Cindy Clay put the adult learning principles into practice, she has created an approach to the design, development and delivery of a virtual workshop that is potentially more engaging than being face-to-face. Great Webinars captures all the essentials to creating a great on-line learning experience. . . . Thanks to the lessons learned in this book, we can now move full speed ahead with our e-learning strategy and I can now feel confident we will be teaching versus simply reaching our customers." Karen Pacent, director, Learning

and Leadership Development, United States Tennis Association "Great Webinars is written in a smart, authentic, practical, sassy, and easy-to-follow way. It reminds us to bring our participants' experience front and center if we want them to be enthralled, and the learning environment to be enriched. Cynthia Clay lets her own students tell us what is wrong with the current use of webinars and then proceeds to teach us how to build 'em better. It's like having her sit beside you saying, 'Don't worry . . . I'll get you there.' And she does." This handbook provides a comprehensive

overview of spatial configurations of language use and of language use in space. It consists of four parts. The first part covers the various practices of describing space through language, including spatial references in spoken interaction or in written texts, the description of motion events as well as the creation of imaginative spaces in storytelling. The second part surveys aspects of the spatial organization of face-to-face communication including not only spatial arrangements of small groups in interaction but also the spatial dimension of sign language and gestures. The third part is devoted to the communicative resources of constructed spaces and the ways in which these facilitate and shape communication. Part four, finally, is devoted to pragmatics across space and cultures, i.e. the ways in which language use differs across language varieties, languages and cultures. Innovative Applications of Online Pedagogy and Course Design Future Strategies Inc. This volume presents research that lies at the intersection of healthcare communication, global migration, and the rapidly expanding technologies used for language testing.

Readers will find engagement with the interdisciplinary studies, given that effective communication - and its assessment - lies at the very core of quality healthcare delivery.

STANDARD MEDICAL OPERATING GUIDELINES (SMOG) continues to go through significant improvements with each release as a result of the collaboration of Emergency Medicine professionals, experienced Flight Medics, Aeromedical Physician Assistants, Critical Care Nurses, and Flight Surgeons. There has been close coordination in the development of these guidelines by the Joint Trauma System, and the Defense Committees on Trauma. Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre-hospital units. It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense. Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics (CCFP) ability to follow and execute the medical instructions herein. These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments. Unit medical providers are not expected to employ these guidelines blindly. Unit medical providers are expected to manipulate and adjust these guidelines to their

unit's mission and medical air crew training / experience. Medical directors or designated supervising physicians should endorse these guidelines as a baseline, appropriately adjust components as needed, and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics, Enroute Critical Care Nurses, and advanced practice aeromedical providers. The medication section of this manual is provided for information purposes only. CCFPs may administer medications only as listed in the guidelines unless their medical director (supervising physician) orders a deviation. Other medications may be added, so long as the unit supervising physician and/or medical director approves them. This manual also serves as a reference for physicians providing medical direction and clinical oversight to the CCFP. Treatment direction, which is more appropriate to the patient's condition than the guideline, should be provided by the physician as long as the CCFP scope of practice is not exceeded. Any medical guideline that is out of date or has been found to cause further harm will be updated or deleted immediately. The Medical Evacuation Concepts and Capabilities Division (MECCD) serves as the managing editor of the SMOG and are responsible for content updates, managing the formal review

process, and identifying review committee members for the annual review. The Standard Medical Operating Guidelines are intended to provide medical procedural guidance and is in compliment to other Department of Defense and Department of the Army policies, regulatory and doctrinal guidance. Nothing herein overrides or supersedes laws, rules, regulation or policies of the United States, DoD or DA.
