Internet Explorer - Adobe

In Adobe Flash Professional CS5 a frame-by-frame animation changes the contents of the Stage in every frame and is best suited to a complex animation in which an image changes in every frame instead of simply moving across the Stage. This type of animation increases the file size more rapidly than tweened animation because Flash stores the ...

Adobe Flash Professional CS5 can create two types of tweened animation: motion tweens and shape tweens. Flash can also

create Classic Tweens, and you can read in this section why they're not covered in this learning guide. Motion tweens are a very common way to create movement with Flash because Flash does most of the work, making things easy for you.
