- Draw and manipulate simple shapes to create vivid icons for workplace safety signage.
- Import external objects, create unique artwork to exact specifications, and incorporate text into an Illustrator design by creating a large-format kitchen-planning guide.
- Master use of the Pen tool -- the most critical tool in the application -- by developing a complete corporate identity package including stationery, envelopes, and business cards.
- Explore Illustrator's many brush libraries, symbols, and patterns to develop a custom map.
- Use advanced typography tools such as character styles, paragraph styles, and glyphs, and learn proper methods for combining imagery and complex text elements into a three-panel brochure.
- Create original artwork using filters, effects, and transparency for retail packaging, an extremely lucrative segment of the graphic design profession.
- Develop functional web components using Illustrator's ability to generate hot links, industry-standard XHTML, slices, and other elements required for site development. In addition, the project employs highly effective coloring functions through the use of Illustrator's Mesh tool.
- Generate attention-grabbing "infographics" to present data from both internal and external sources. In the final project, the student will simulate three-dimensionality both manually, through the use of guides and two-point perspective, as well as with Adobe's built-in Transformation functions
