National Safety Congress Transactions Springer

This book is an introductory outline of NFPA 72, 2010 edition based upon the National Fire Protection Association training seminar in Fire Alarm Inspection and Testing given in December 2009. This book concentrates on Inspections as opposed to Testing and gives a foundation in the NFPA 72, 2010 edition of the National Fire Alarm Code book for Inspections as a separate job function. The purpose of this book is to clarify to other inspectors, managers, customers,

and authorities having jurisdiction; when to inspect and when to test; based upon the National Fire Protection Association training seminar in December 2009.

Security in Computing and Communications John Wiley & Sons

Covering everything required to build and manage a security system, Facility Manager's Guide to Security discusses the layout of the facility in order to provide security for workers, plants, processes, and products. The book covers distances and separation, fencing, access control, intrusion detection systems, pass key, key control systems, locks, hasps, and gates. It also explores more sophisticated systems such as closed circuit television, microwave transmitters, lasers, lighting, clear zone, and computer systems and control electronic systems. In addition, non-hardware aspects of security are examined, including security clearances and background checks, guards, rounds, shift work, training, and procedure development. Written by a former defense department official with 30 years of experience in the defense sector, this valuable book explains all aspects of facility security. Facility managers will discover useful strategies for managing security personnel, guards, guard dogs, rounds shift work, training, procedure development, and other non-hardware elements of a security program.
