This book offers a comprehensive and critical guide to research and practice in the field of arts education and conflict management. The DRACON project explores the relationship between drama and conflict transformation. This international, interdisciplinary and comparative action research project, begun in 1996, is aimed at improving conflict management and transformation among adolescent school students using the medium of educational drama. The book reports on the underpinning principles, and on action research practice in Malaysia, Sweden and Australia. The strategies and techniques, which were revolutionary when first introduced, are now tried and tested. The book chronicles the history, successes, opportunities and challenges of the original 10-year project, and brings the story up to date by highlighting some of its many legacies and resulting influences around the world. This book will benefit researchers, academics

and graduate students in Education, the Social Sciences, Dispute Resolution and the Performing Arts.

Developmental Cognitive Behavioral Therapy with Adults outlines a new cognitive approach that combines existing CBT theory and strategies with a lifespan developmental psychopathology perspective. The major focus is on the relationship between mastery of normative psycho-social developmental tasks and mental health. Primary targets for therapy are maladaptive developmental pathways that have significantly disrupted the client's ability to cope with normal adult tasks and challenges. The book builds on standard cognitive therapy models and techniques, while providing further assessment and therapy strategies to address patterns interfering with resolution of normative

adult tasks and roles. It introduces several new developmental assessment and therapy strategies, designed to address client difficulties with normal adult developmental tasks and to identify longstanding maladaptive pathways maintaining these difficulties. The book offers a variety of psycho-social developmental task difficulties in occupational, social, and family functioning. The clinical examples provide a deeper understanding of pathways to competence, as well as pathways to deviance, and the contrast between normal and atypical processes as they emerge at different developmental periods.
