The Business Year has charted the course of the Omani economy for a decade, and this year we focused on the Sultanate's diversification plan and its sustainability agenda. While the country is less hydrocarbons rich than its GCC neighbors, infrastructure and renewable energy development, as well as green hydrogen, could be driving forces for growth in the years to come. Both the public and private sectors closely follow the tenets of Vision 2040, a wide-ranging blueprint for growth the kind of which has become ubiquitous across the region. The Business Year: Oman 2023 features interviews, articles, and analysis over 185 pages.

The Innovative Business School formulates a blueprint for the innovative business school of the next decade, with proposed areas of innovation which will train executives to transform the coming technological disruptions into an avenue for world economic development and prosperity. Offering a new model of business education, the book maps the way forward for business school innovators in exploring questions related to innovation and strategy needed on the part of academic and industry leaders and educators across demographic divides. The chapters cover an overall international and cross-cultural approach in examining the factors at play for business schools of the future and the challenges they face across a range of megatrends affecting today's business environment. The authors impress the need for stakeholders to strategically engage others in the business and education ecosystems through commitment to experimentation, innovation, and sustainable business strategy. Identifying such opportunities for development of a new model for business schools is important to educators and policymakers in preparing to leverage and contribute to existing megatrends to create shared value for regional economies and in new directions. The Innovative Business School is written for business schools' management and decision-makers, related stakeholders, universities, accreditation agencies, and postgraduate students.

The Complete Book of Colleges, 2012 Edition John Wiley & Sons Career Planning for Research Bioscientists is an essential careers guide for bioscience doctoral students and postdoctoral researchers. It contains a wealth of information and resources specifically targeted at research bioscientists, with practical strategies to enhance career success in an increasingly competitive job market. Advice on how to write a winning CV together with examples adapted for different jobs is presented, as well as practical exercises to assist with skills analysis and decision making. Profiles of PhD-qualified bioscientists in a range of professions including academic research, industry, science communication, management and consultancy provide valuable insights into how others have managed their careers, and tactics such as networking and using social media demonstrate how new opportunities can be discovered. The content of this book is aimed primarily at research bioscientists, however much of the advice and information will be a useful reference for other students and researchers looking for an effective career planning strategy. [The Innovative Business School](#) The Business Year How do some high schools produce graduates that consistently achieve at high levels? Would you believe there's a set of proven strategies that could help you deliver similar impressive results and better prepare students for the world after high school? High schools in the United States face a startling reality: many graduates are unprepared for success in postsecondary studies or for high-demand, well-paying jobs in a rapidly changing economy. Although this situation is alarming, the high schools that have embraced new ways of learning show us what is possible. Drawing from his experience with the High Schools That Work initiative, Gene Bottoms offers educators a path forward by urging them to pursue bold goals and outlining bold actions for achieving those goals. His vision is clear: replace the traditional model of secondary education with one that engages students in a rigorous curriculum that combines a solid academic core with intellectually demanding career pathway courses. The notion that nearly all students can achieve at high levels is borne out by numerous examples of high schools—including those with traditionally underperforming student populations—that have used key strategies to help all students realize their potential. Bottoms explains the root causes of the current shortcomings in high school education and then specifies critical components of successful transformation: \* Shared leadership; \* Powerful assignments—especially in math, literacy, and career/technical education—planned and executed by academic and career pathway teachers working together; \* Strengthened connections between middle school and high school; \* A redesigned senior year; and \* Comprehensive counseling and advisory programs. Provocative and persuasive in its sense of urgency, Tomorrow's High School offers proven and practical solutions to finally make high schools a rich and rewarding experience for all students, whatever their future college and career goals may be. This book is a copublication of ASCD and SREB. It includes access to nine downloadable appendixes.

Known since 1971 as the "Red Book," The Directory of Executive Recruiters has been called "the bible" of the industry by CNBC and Sylvia Porter. It is the largest continuously updated recruiter database in the world. This jumbo hardcover edition is specially designed to help corporate buyers of search services make informed decisions on which recruiting firm would best suit their hiring needs. It is also useful to search providers for competitive intelligence, acquisitions, and partnerships. The Directory lists over 8,000 offices of 5,700 search firms in the U.S., Canada and Mexico and contain detailed information on each firm: street addresses, phone numbers, fax numbers, e-mail and web addresses, plus function and industry specialties. It is comprehensively indexed by function, industry, specialty and geographic location. The unique specialty index has 565 niche categories with the names and company affiliations of over 14,000 recruiters. In addition, the Corporate Edition reports firm revenues, number of recruiters and year founded and lists full contact information for international branch offices. It also contains a key contact index. Introductory pages give expert advice to corporate hirers on choosing and using executive search firms.
